LETTER OF TRANSMITTAL

November 20, 2010

The Honorable Mark Sanford, Governor
and
State Budget and Control Board
State of South Carolina

Gentlemen:

We are pleased to present the *Comprehensive Annual Financial Report* (CAFR) of the South Carolina Retirement Systems for the fiscal year ended June 30, 2010. The South Carolina Retirement Systems is required by Section 9-1-300 of the South Carolina Code of Laws to publish annually a report of the fiscal transactions of the Systems and this CAFR fulfills that statutory requirement. Since the Retirement Systems is a part of the primary government of the state of South Carolina, the Systems' financial information is also included in the comprehensive annual financial report of the state. Responsibility for both the accuracy of the data, and the completeness and reliability of the presentation, including all disclosures, rests with the management of the Systems. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of the Systems.

The CAFR was prepared to conform to the principles of governmental accounting and reporting set forth by the Governmental Accounting Standards Board (GASB). Transactions of the Systems are reported on the accrual basis of accounting. Sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules; however, the cost of internal control should not exceed anticipated benefits. The financial statements presented in this CAFR have been independently audited by Clifton Gunderson, LLP, under the direction of the State Auditor's Office. Clifton Gunderson issued an unqualified opinion, which means that based upon the audit, they concluded that the financial statements were fairly presented in all material respects and are free from material misstatement, inconformity with accounting principles generally accepted in the United States of America. In accordance with *Governmental Auditing Standards*, as part of obtaining reasonable assurance about whether the Systems' financial statements are free of material misstatement, Clifton Gunderson also considered internal controls over financial reporting and compliance with certain provision of laws, regulations, contracts, and other matters. Although independent auditors cannot guarantee the accuracy of the statements, they do have a reasonable basis for the opinion they render. The independent auditor's report is presented as the first component of the financial section of this report. Management's Discussion and Analysis (MD&A), which can also be found in the financial section starting on Page 25, provides a narrative introduction to and analysis of the financial statements. This letter of transmittal is meant to complement the MD&A and should be read in conjunction with it.

Introductory Section

Profile of the Systems

The South Carolina Retirement Systems administers five defined benefit pension plans that provide lifetime service retirement benefits, as well as disability benefits and death benefits to eligible members and/or their surviving beneficiaries. The plans' terms specify the amount of pension benefits to be provided at a future date or after a certain period of time. The amount specified is a function of a formula based on years of service, compensation, and age. Our administrative and reporting structure is outlined in the introductory section of this report.

This report contains information on the following defined benefit pension trust funds:

- The South Carolina Retirement System (SCRS) was established July 1, 1945, to provide retirement and other benefits for teachers and employees of the state and its political subdivisions. SCRS covers employees of public school districts, higher education institutions, and other participating local subdivisions of government.
- The Police Officers Retirement System (PORS) was established July 1, 1962, to provide retirement and other benefits to police officers and firefighters. PORS also covers peace officers, coroners, probate judges and magistrates.
- The Retirement System for Members of the General Assembly of the State of South Carolina (GARS) was established January 1, 1966, to provide retirement and other benefits to members of the General Assembly.
- The Retirement System for Judges and Solicitors of the State of South Carolina (JSRS) was established July 1, 1979, to provide retirement and other benefits to state judges and solicitors. JSRS also covers circuit public defenders.
- The National Guard Retirement System (NGRS) was established July 1, 1975, to provide supplemental retirement benefits to members who served in the South Carolina National Guard.

Fiscal Year 2010 Highlights

Legislative changes enacted in fiscal year 2010 are described within this section of the letter of transmittal. The fiscal year ended June 30, 2010, was yet another active and challenging year for the South Carolina Retirement Systems. One of the most basic challenges that the Retirement Systems continued to face during the year was to continue to provide stakeholders with customer service at a best practices level, while reducing administrative costs.

In fiscal year 2010, the Retirement Systems implemented an online customer satisfaction survey which allowed us to gauge satisfaction with our service among more stakeholder groups than in previous fiscal years. In addition to covered employers and retired members, both with satisfaction ratings exceeding 97 percent, we obtained satisfaction ratings from active employees and other members. Other members include beneficiaries, inactive members, and those survey participants who chose not to identify their category. Ratings for active employees and other members were more than 96 percent and 90 percent, respectively.

Retirement Systems' staff continued efforts to improve efficiencies in all operational areas while limiting expenditures. However, our infrastructure and human capital have been extended far beyond capacity and the Retirement Systems hopes to provide relief in the form of additional resources when it becomes economically feasible to do so.

Introductory Section

Disability Retirement Applications

Act 162 of 2010 amended the statutes governing a member's eligibility for disability retirement benefits under the correlated retirement plans administered by the Retirement Systems to provide that a member is considered "in service"— and thus eligible to apply for disability retirement — if he or she is not retired and the last day the member was employed by a participating employer in the relevant plan was not more than 90 days prior to the date the application was filed. The Act applies retroactively to any application for disability retirement benefits filed on or after May 12, 2008, the date on which a decision was issued by the South Carolina Supreme Court that changed the Retirement Systems' longstanding interpretation of the disability retirement statutes.

Operational System Improvements

During fiscal year 2010, significant improvements were implemented in the web-based Electronic Employer Services (EES) system. Changes included:

- Allowing the Office of the Comptroller General's (CG's) payroll system for state employees to electronically submit transactions to the Retirement Systems for enrollment events for active members, return-to-work retirees, and non-members via the CG's new South Carolina Enterprise Information System (SCEIS);
- Allowing authorized employers to download custom data files which include retirement information for their employees; and
- Enhancing the security and privacy restrictions of EES.

Ranking Among Peer Pension Plans

Compliance with best practices within the public pension industry is a critical element of the Retirement Systems' management values. Therefore, the South Carolina Retirement Systems participates biennially in a public pension plan benchmarking analysis conducted by Cost Effectiveness Management, Inc., (CEM). Biennial participation allows the Retirement Systems to achieve cost savings while still having access to recent benchmarking information for strategic planning and accountability purposes. Seventy-three public pension plans participated in the CEM survey for 2009, which marked the eighth year of participation for the Retirement Systems.

Although the Retirement Systems is a customer centric organization, we are also a division of South Carolina state government and as such, must adhere to stringent budgetary guidelines. According to the CEM report, the South Carolina Retirement Systems' total adjusted administrative cost per member was \$46 in comparison to a peer median cost of \$78. Although our low administrative cost is partially attributable to the efficient and proactive deployment of automated systems and appropriately allocated human resources, it is also reflective of deferred technological system improvements and limited human capital.

Investment Returns

In the aftermath of the most significant financial crisis since the Great Depression, most major financial markets rebounded sharply during the fiscal year ending 2010. These colossal market swings, along with weakening economic growth forecasts, created a complex backdrop against which the South Carolina Retirement System Investment Commission (Commission) managed the assets of the Plan.

As of June 30, 2010, the Retirement Systems' assets in the investment portfolio were valued at \$22.9 billion, much higher than the \$21 billion of assets one year prior. In addition to this portfolio growth, from a cash

Introductory Section

flow perspective, a net amount of \$899 million was paid out of the plan for retiree obligations. The portfolio's overall performance for the fiscal year ending June 30, 2010 was 14.62 percent. This performance significantly exceeded its benchmarks as well as the 8% actuarial assumed rate of return.

The plan assets are invested in a manner consistent with a long-term investment time horizon. While the financial markets continue to experience significant volatility, the assets of the Retirement Systems are invested in a broadly diversified manner to help mitigate risk. It should be noted that accrued member benefits under the Retirement Systems' defined benefit plans are not dependent on individual account balances or investment returns.

Summary of Financial Condition

The funding objective of the pension trust funds is to meet future benefit obligations of retirees and beneficiaries through contributions and investment earnings. Each year, our external consulting actuaries determine the actuarial soundness of the plans based on long term obligations and the sufficiency of current contribution levels to fund the liabilities of each plan over a reasonable time frame. In our most recent valuations dated July 1, 2009, the actuarial consultants concluded that all systems are operating on an actuarially sound basis. All five systems are considered to be adequately funded within the Governmental Accounting Board's standards and the SC Budget and Control Board's policy that requires actuarial liabilities be funded within 30 years.

The funded ratio for SCRS, which represents the largest membership of the five plans, decreased slightly from 69.3 percent to 67.8 percent. The unfunded actuarial liability for SCRS increased from \$11 billion to \$12 billion. Accordingly, the period for amortizing SCRS' unfunded actuarial accrued liability grew; however, in order to satisfy the required 30 year amortization period, the increase was offset through an employer contribution increase of 0.290 percent, of which 0.145 percent is effective July 1, 2011, and 0.145 percent is effective July 1, 2012.

In accordance with Act 311, up to a 2 percent automatic annual Cost of Living Allowance (COLA) is provided when certain conditions are satisfied. The Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) for the calendar year ended December 31, 2008 declined from the prior year. This resulted in no COLA being applied to annuity benefits during fiscal year 2010. It also impacted the actuarial valuation by decreasing plan liabilities and resulted in a reduction to the amortization period. The plan experienced an actuarial loss on plan assets because investment returns were less than the assumed rate of return, although an actuarial smoothing technique is utilized to recognize gains and losses over a period of years. Other non-investment related experience activity considered normal within the course of plan experience contributed to other gains and losses, as actual experience cannot be precisely predicted and will never exactly match the estimated assumptions.

The current funded ratios of the five plans range from a low of 34.8 percent for NGRS to a high of 76.3 percent for PORS. The NGRS has a very low funded ratio because at one time, the plan was not funded on an actuarial sound basis. In 2006, the General Assembly made a commitment to ensure the NGRS plan would be sufficiently funded prospectively and transferred administrative responsibility from the Adjutant General's Office to the South Carolina Retirement System. Now recurring funds are set aside each year in the state's annual budget to fund NGRS over an amortization period that does not exceed 30 years, so we anticipate continued improvement in the funded ratio. More detailed information regarding the financial condition of the pension trust funds can be found in the financial and actuarial sections of this report.

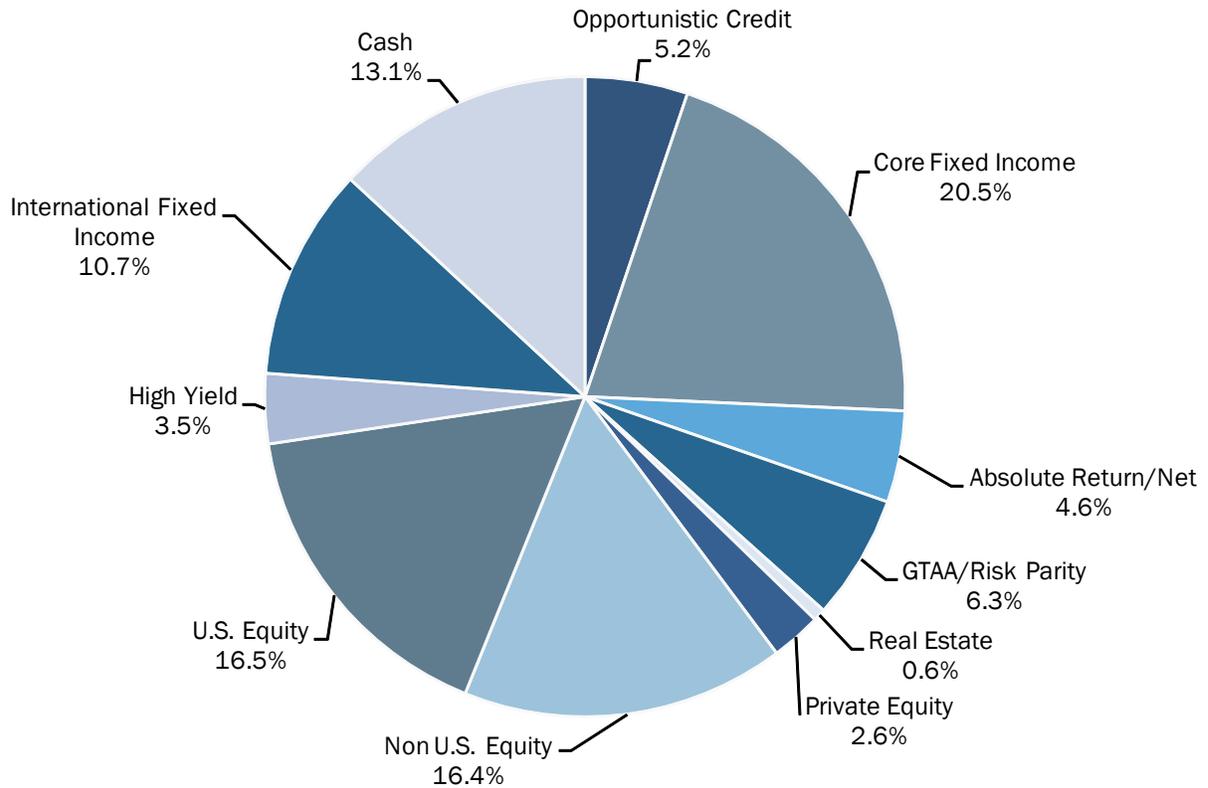

Introductory Section

An optimally diversified investment portfolio is designed to generate long-term returns sufficient to ensure that the program is financially sound. While the Systems' investment performance was previously limited by our state constitution and state statute, the RSIC continues implementation of a modern-day asset allocation policy. With the help of the RSIC's investment consultants (NEPC), the RSIC deployed investments across a progressive asset allocation designed to generate attractive long-term risk-adjusted returns. In order to achieve its long-term goals, the RSIC remains committed to deploying capital opportunistically. In the near future, the RSIC expects to capitalize on opportunities in private equity and debt, real estate, and emerging markets.

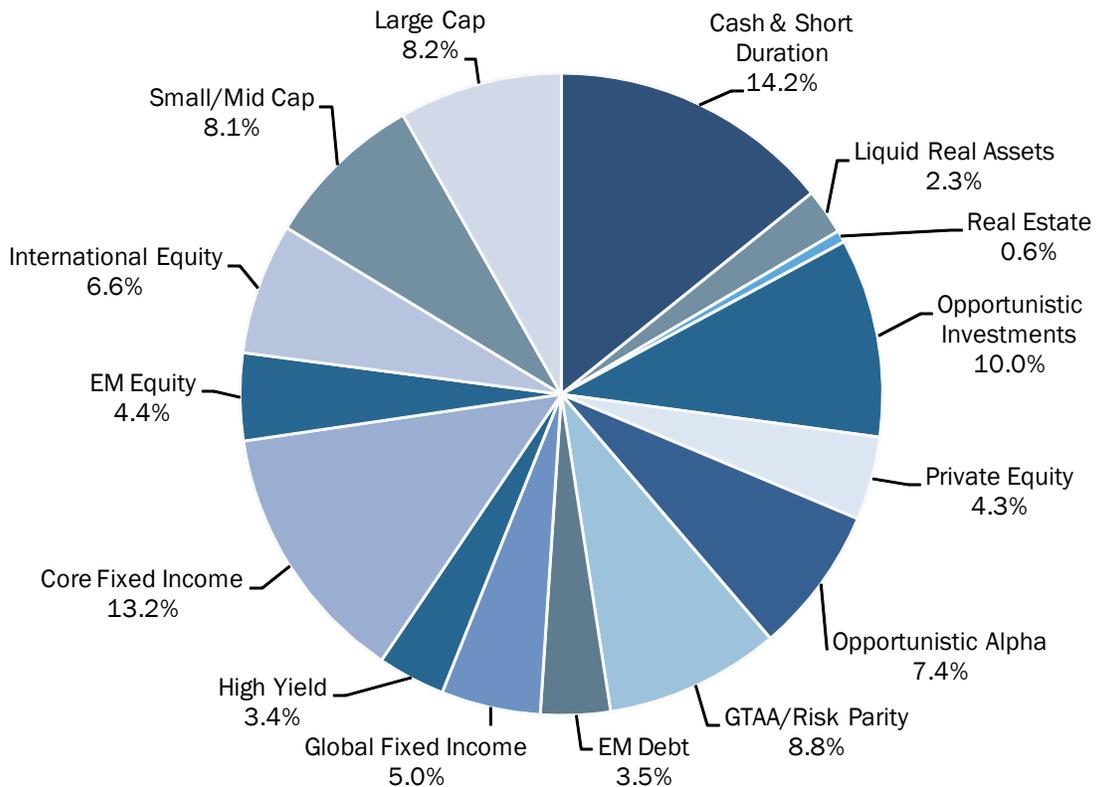

The following charts summarize the Retirement Systems' diversification progress from the prior fiscal year and the target allocation adopted as of June 30, 2010.

Introductory Section

Actual Asset Allocation as of June 30, 2009

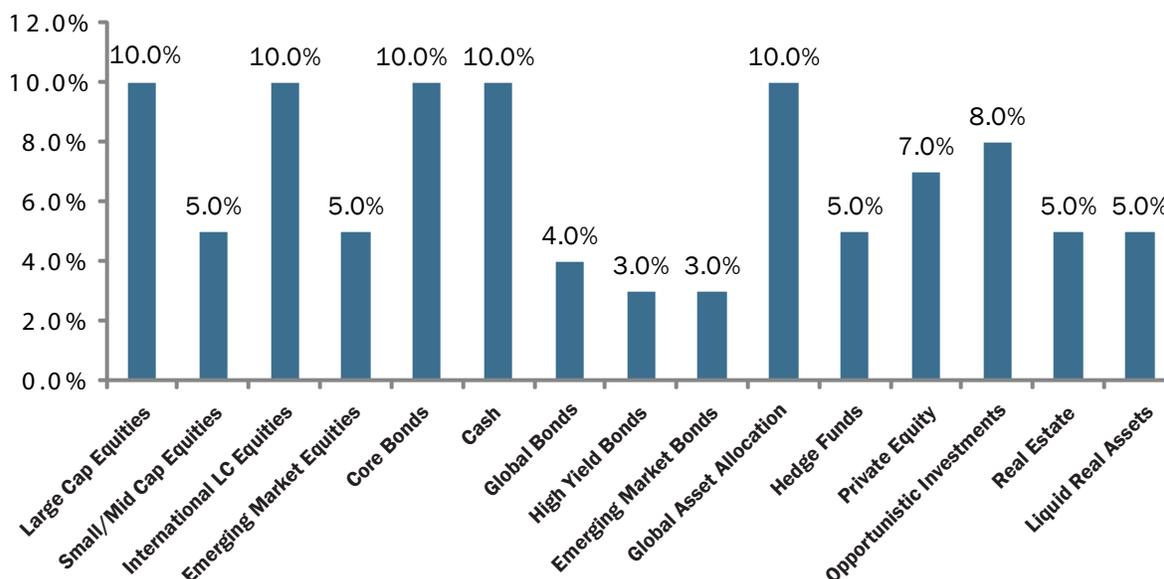

Actual Asset Allocation as of June 30, 2010

Introductory Section

Target Asset Allocation

Note: Target Asset Allocation was adopted by RSIC on March 31, 2009.

For the year ended June 30, 2010, the combined Systems' investment portfolio produced a total aggregate investment return of 14.62 percent. Current year performance was significantly better than the actuarial assumed rate of return utilized for actuarial valuation purposes; however, industry standard actuarial smoothing methodology mitigates market volatility by offsetting investment gains and shortfalls over a period of years.

Investment performance in comparison to the assumed rate of return is a significant factor in our actuarial valuations. As referenced above, the actuarial asset valuation method recognizes a portion of the difference between the actual market value of assets and the expected actuarial value of assets, based on the assumed investment rate of return of 8 percent. This actuarial asset valuation method dampens year-to-year fluctuations, smooths the effect of volatility in the market and helps provide a consistent estimate of the value of assets. Detailed investment results for fiscal year 2010 can be found within both the financial and investment sections of this report.

It is paramount to note that the five defined benefit plans administered by the South Carolina Retirement Systems are considered actuarially sound. Annuity benefits are sufficiently funded based on current contribution levels. For additional financial information, please refer to management's discussion and analysis, financial statements and schedules included in the financial section of this report.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the South Carolina Retirement Systems for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2009. This was the 23rd consecutive year that the Retirement Systems has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive

Introductory Section

annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Public Pension Standards Award

The South Carolina Retirement Systems received the Public Pension Coordinating Council's Public Pension Standards Award in 2010 for the seventh consecutive year in recognition of meeting professional plan design and administration standards. The Public Pension Coordinating Council is a confederation of the National Association of State Retirement Administrators, the National Conference on Public Employee Retirement Systems, and the National Council on Teacher Retirement.

Acknowledgments

The compilation of this report reflects the combined efforts of the staff of the South Carolina Retirement Systems functioning under your leadership. The report is intended to provide comprehensive and reliable information about the Retirement Systems, to demonstrate compliance with legal provisions, and to allow for the evaluation of responsible stewardship of the funds of the Retirement Systems.

We express our gratitude to the members of the Board, the staff, the consultants, and the many people who have worked so diligently to assure the continued successful operation of the Retirement Systems.

Respectfully submitted,

Organizational Chart

Introductory Section

Organizational Description

The structural organization of the Systems is depicted in the organizational chart on Page 19. A brief description of the primary functions performed by each department follows:

Administration

Responsible for managerial, budgetary, and administrative oversight of all division operations; physical plant issues, operations, and maintenance; procurement; human resources activities; communications and public information; accounts payable; postal center operations; and courier services. Also responsible for training employers in all aspects of the Retirement Systems' member benefits, reporting procedures, and the Internet-accessed employer information system; meeting with employees as requested to present benefit overviews and pre-retirement education programs; and coordinating and conducting retirement seminars designed to better prepare members whose retirement is imminent.

Payroll, Financial and Actuarial Reporting

Functioning as chief financial office for the Retirement Systems, responsibilities encompass maintaining comprehensive financial accounting systems, including actuary, investments and disbursements of benefit payments, for the five statutorily defined benefit retirement plans. This department is responsible for preparation of the *Comprehensive Annual Financial Report* and *Popular Annual Financial Report* as well as staffing accounting roles for disbursing funds and reporting of financial data; tax reporting; managing daily financial operations; establishing financial policies and procedures; and communication related to actuarial valuations, legal issues and fiscal impact of proposed legislative changes. Benefit payments are disbursed in the form of monthly annuities, TERI distributions, refunds to terminated members, and death payments to beneficiaries.

Customer Claims

Responsible for the processing of customer claims relating to annuities, refunds, or death claims; the computation of the cost for purchases of prior service for all members of the Retirement Systems; and the auditing of service credit for our membership.

Information Technology

Responsible for the design, implementation and control of all automated applications within the Systems; and the maintenance of complete historical records of each member via digital imaging.

Financial Employer Services

Responsible for determining the average final compensation to be used in calculating a member's annuity benefit at retirement; collecting and allocating member and employer contributions; maintaining membership enrollment and beneficiary information; and the State Optional Retirement Program.

Customer Services

Responsible for member consultations (in person, by telephone, or on-line via the Internet) in all phases of retirement operations.

Legal

Responsible for representing the South Carolina Retirement Systems in matters before circuit and appellate courts and administrative bodies, and for providing program support to the management of the South Carolina Retirement Systems.

Internal Audit

Responsible for providing an independent appraisal function to examine and evaluate processes and policies, and for providing assurance to management regarding the internal control structure of the division.

Financial Section

Although financial markets may move quickly and dramatically short-term, investment performance does not shift significantly over a long-term investment horizon.

**Although financial markets

Independent Auditor's Report

The Honorable Mark Sanford, Governor,
Members of the State Budget & Control Board, and
Richard H. Gilbert, Jr., Deputy State Auditor
South Carolina Retirement Systems
Columbia, South Carolina

We have audited the accompanying financial statements of the South Carolina Retirement Systems (the Systems), a component unit of the State of South Carolina, as of and for the year ended June 30, 2010, as listed in the table of contents. These financial statements are the responsibility of the Systems' management. Our responsibility is to express an opinion on these financial statements based on our audit. The prior year summarized comparative information has been derived from the Systems' 2009 financial statements which were audited by other auditors and, in their report dated October 21, 2009, the other auditors expressed an unqualified opinion on those financial statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the Systems' plan net assets as of June 30, 2010, and the changes in its plan net assets for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis and Required Supplemental Schedules of Funding Progress and Employer Contributions are not a required part of the financial statements, but are supplemental information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplemental information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming an opinion on the financial statements taken as a whole. The Other Supplementary Information on pages 61 through 67 is presented for purposes of additional analysis and is not a required part of the basic financial statements. This information has been subjected to the auditing procedures applied in the audit of the basic financial statements, and, in our opinion, is presented fairly, in all material respects, in relation to the basic financial statements taken as a whole.

The Introductory, Investment, Actuarial and Statistical Sections as listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Introductory, Investment, Actuarial and Statistical Sections have not been subject to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Financial Section

The supplementary information included on pages 61 through 67 related to the Systems' 2009 financial statements was subjected to auditing procedures applied in the audit of those financial statements and, in the opinion of the predecessor auditors is fairly presented in all material respects in relation to the basic financial statements from which it was derived.

October 14, 2010

Management's Discussion and Analysis

This section presents management's discussion and analysis of the South Carolina Retirement Systems' financial position and performance for the year ended June 30, 2010, and is offered as an introduction and analytical overview. This narrative is intended as a supplement and should be read in conjunction with the financial statements and other information presented in the Comprehensive Annual Financial Report.

The Retirement Systems' financial statements provide information about the activities of the five defined benefit pension plans administered (listed below), in addition to comparative summary information about the activities of the Retirement Systems as a whole:

- *South Carolina Retirement System (SCRS)* - A member contributory multi-employer plan covering teachers, as well as state and municipal employees;
- *Police Officers Retirement System (PORS)* - A member contributory multi-employer plan covering state and local law enforcement personnel and firefighters;
- *The Retirement System for Members of the General Assembly (GARS)* - A member contributory plan providing benefits to the members of the South Carolina General Assembly;
- *The Retirement System for Judges and Solicitors (JSRS)* - A member contributory plan covering Judges, Solicitors and Public Defenders; and
- *The National Guard Retirement System (NGRS)* - A non-contributory supplemental benefit plan for members of the South Carolina National Guard.

Overview of the Financial Statements

The South Carolina Retirement Systems represents the collective retirement funds that are held in a group trust and are under the management of the State Budget and Control Board. The System is considered a division of the primary government of the state of South Carolina and is included in the comprehensive annual financial report of the state. The Retirement Systems' (Plan's) financial statements include the following components:

- Statement of Plan Net Assets
- Statement of Changes in Plan Net Assets
- Notes to the Financial Statements
- Required Supplementary Information
- Other Supplementary Information

The *Statement of Plan Net Assets* presents the Plan's assets and liabilities and the resulting net assets, which are held in trust for pension benefits. This statement reflects a year-end snapshot of the Plan's investments, at fair value, along with cash and short-term investments, receivables and other assets and liabilities.

The *Statement of Changes in Plan Net Assets* presents information showing how the Plan's net assets held in trust for pension benefits changed during the year. This statement includes additions for contributions by members and employers and investment earnings and deductions for annuity payments, refunded contributions, death benefit payments and administrative expenses.

Notes to the Financial Statements are an integral part of the basic financial statements and provide additional information that is necessary in order to gain a comprehensive understanding of data reported in the basic financial statements.

Financial Section

Required Supplementary Information presents information concerning the Retirement Systems' funding progress trends and its obligations to provide pension benefits to members. A schedule of required employer contributions is also presented and is useful in evaluating the condition of the plans.

Other Supplementary Information includes Schedules of Changes in Plan Net Assets by system, as well as schedules of administrative expenses, professional and consultant fees and investment expenses.

Financial Highlights

- For the fiscal year ended June 30, 2010, the aggregate rate of return on the pooled investments of the consolidated pension trust funds was 14.62 percent. Performance returns are determined and provided by our custodial bank who is considered the official book of record. A performance adjustment was made for a securities lending loss that was recognized in fiscal year 2009 for financial statement purposes and as a result, fiscal year 2009 investment performance returns were restated. As expected, the move served to increase the return for fiscal year 2010 and lower the return originally reported for fiscal year 2009. Linking these adjustments produced a revised return of negative 19.60 percent for the prior fiscal year, down from the previous negative 19.04 percent that was originally reported. Similarly, the revised return for fiscal year 2010 improved to 14.62 percent, from 14.24 percent.
- Fiscal year 2010 returns for the combined investment portfolio were significantly above the restated negative 19.60 percent return from the prior fiscal year and above the 8 percent actuarial investment assumed rate of return for the plans. Although the financial market has been exceptionally volatile over recent years, the long-term impact from an actuarial funding perspective is somewhat mitigated through the use of actuarial smoothing methods.
- The South Carolina Retirement System Investment Commission (RSIC), with exclusive authority to invest and manage the trust funds assets, operates under governance policies that allow for a diverse asset allocation that affords the chief investment officer flexibility to quickly react to changes in market conditions. The investment portfolio is structured to focus on ensuring long-term stability of the plans.
- The South Carolina Retirement Systems' total plan net assets increased by \$2.2 billion or 10.73 percent during fiscal year 2010. Total plan net assets represent all five pension trust funds administered by the South Carolina Retirement Systems. Net assets of the plans are held in trust to meet future benefit payments. The increase in net assets from \$20.5 billion to \$22.7 billion was primarily due to positive returns in the investment market, although a minor increase in benefit payment expenditures had an impact by offsetting the increase in net assets slightly.
- The RSIC is responsible for establishing and maintaining a target asset allocation that manages risk, ensures liquidity, and affords flexibility to quickly react to changes in market conditions. Variances among asset classes are a result of changes to the Investment Commission's asset allocation strategies as well as changes in many global financial markets. During the fiscal year, due to market conditions and cash liquidity requirements for funding investment commitment obligations and paying benefits, a greater portion of the investment portfolio remained allocated to cash and cash equivalents.
- The decrease in securities lending collateral is primarily due to unfavorable market conditions during the fiscal year. The demand for lendable securities has decreased and the fixed income and equity securities within the portfolio continue to be reduced to fund other assets classes that are not lendable. As a result

Financial Section

of the unfavorable market environment, as well as restrictive investment guidelines for the collateral pool that were put in place to reduce risk, securities lending income continues to decline.

- The Teacher and Employee Retention Incentive (TERI) program is a deferred retirement option program that allows retired members to accumulate annuity benefits on a deferred basis for up to five years while continuing employment. At the end of the member's TERI participation and upon termination from employment, funds are distributed from the accumulated TERI account. The total amount of assets held in trust for future payment of accrued TERI benefits decreased from \$431 million to \$322 million during fiscal year 2010, with the number of members actively participating in TERI decreasing as well from 6,571 to 5,641 at fiscal year end.
- The JSRS also provides a deferred retirement option program. A JSRS member who has not yet reached the age of 60 years, but who is eligible to retire and receive the maximum monthly benefit may continue to serve as judge, solicitor, or circuit public defender and the member's normal monthly retirement benefit is deferred and placed in the system's trust fund on behalf of the member. Upon reaching the age of 60 years, the balance of the member's deferred retirement benefit is distributed to the member. As of June 30, 2010, three JSRS members were participating in the deferred retirement option program and benefits held in trust totaled \$743,000.
- The number of retired members and beneficiaries receiving monthly annuity benefits from the Retirement Systems' plans increased to nearly 130,000 annuitants during the year. No cost of living allowance was granted July 1, 2009; therefore, an increase in the number of new annuitants added to the payroll during the year was the sole contributor to the 3 percent increase in the dollar amount of annuity benefits paid to members.
- Although participation in TERI continues to decline over the years, many retirees return to covered employment after retirement, thereby making up approximately 9 percent of the total public workforce. South Carolina has very lenient return to work provisions in that a retired member of SCRS and PORS is allowed to return to work for a covered employer after retirement or after ending their TERI participation (SCRS only), and receive their full monthly benefit, with no limit on the amount of wages they may earn from employment. Retirees who return to work for a covered employer after retirement or ending participation in the TERI program are required to pay the same employee contribution as an active member in the same position and their employer must pay the corresponding employer contribution.
- JSRS also includes working retiree provisions in that members of JSRS who are age 60 and are eligible to receive the maximum monthly benefit may also retire and receive their monthly retirement benefit while continuing to earn a salary and serve as a judge, solicitor or circuit public defender until the member attains the age of 72.
- South Carolina state statute allows for retiree cost-of-living allowances (COLAs). Each July 1, eligible retired members of SCRS and PORS should receive an automatic COLA equal to the percentage of the annual increase in the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should equal the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA will be awarded if the CPI-W is negative. The Budget and Control Board, as trustees of the state's pension trust funds, may approve ad hoc COLAs of up to 2 percent in addition to the automatic

Financial Section

COLA, but only if stringent funding requirements are met. Retirees did not receive a COLA in fiscal year 2010 as a result of a negative CPI-W; however a 2 percent COLA was applied to eligible retirees the following year and was effective July 1, 2010.

- Other accounts payable increased significantly due to pending investment trades at year end by several of the large fixed income managers who were hired at the end of the fiscal year 2009.
- Employee and employer contributions decreased because the number of active members declined. Additionally, as a result of retirement incentives offered by employers and the depressed economy which caused members to be terminated, forced to retire early, or have their compensation reduced, contributions to the plans were impacted.
- The Retirement Systems experienced a 3.57 percent reduction in the amount of administrative and other expenses during the fiscal year due to budget restrictions and sustained and successful efforts to conserve financial resources during the depressed economic environment.
- Qualified Excess Benefit Arrangement (QEBA) trust funds are maintained for each of the plans administered by the South Carolina Retirement Systems with the exception of NGRS. A QEBA is intended to be a qualified governmental excess benefit arrangement within the meaning of Section 415(m)(3) of the Internal Revenue Code and provides the part of a participant's retirement benefit that would have been paid under the South Carolina Retirement Systems had there been no limitations under Code Section 415(b). The QEBA plans are separate and apart from the funds comprising the Retirement funds and are not commingled with assets of those funds. The QEBA is not prefunded; therefore, no assets or income are accumulated to pay future benefits. The amount of required contributions necessary to pay benefits under the plans is determined and deposited to the QEBA trust funds on an as-needed basis. Employer contributions to fund the excess benefits are not credited or commingled with contributions paid into and accumulated in the Retirement funds.
- At its June 30, 2010, meeting, the SC Budget and Control Board approved the following contribution rate increases for employers participating in the South Carolina Retirement System (SCRS) and the Police Officers Retirement System (PORS) in order to maintain 30 year funding period for the 2009 actuarial valuations. Effective July 1, 2011, the SCRS employer contribution rate will increase 0.145 percent and the PORS employer contribution rate will increase 0.2325 percent. Effective July 1, 2012, the contribution rates for SCRS and PORS employers will increase another 0.145 percent and 0.2325 percent respectively. The Board approved the increases based on the recommendations of the actuaries who conducted the annual valuations of the two retirement plans. The rate increases are illustrated in the following table:

<u>System</u>	<u>July 1, 2010</u>	<u>July 1, 2011</u>	<u>July 1, 2012</u>
SCRS	9.240%	9.385%	9.530%
PORS	11.130%	11.363%	11.595%

Condensed Financial Information

The Retirement Systems' ability to adequately fund retirement benefits payable to members in future years is viable because funds are accumulated and invested on a regular and systematic basis. The five defined benefit

Financial Section

funds provide lifetime annuity benefits to vested eligible members who serve as employees of state, public school, higher education institution, local and municipal government, state legislative, judicial, and South Carolina National Guard employers.

The Systems' principal sources of revenue are employee contributions, employer contributions and investment earnings. Required annual contributions for the NGRS are funded through an annual state appropriation. Expenses of the Systems consist primarily of payments of monthly annuities to retired members or their beneficiaries, and refunds of member contributions plus interest paid subsequent to termination of employment. Other programs administered by the Systems include an incidental death benefit for both active and retired members and an accidental death plan for members of the PORS.

The following summary of comparative financial statements of the pension trust funds are presented on the following page.

Analysis of the Plan's Financial Position and Results of Operations

On a combined basis, Plan net assets were valued at \$22.7 billion at June 30, 2010, representing a 10.73 percent increase in net assets from the previous fiscal year-end. Investment income, in excess of net benefits paid out, was the primary driver of the increase in Plan net assets for the fiscal year.

The Plan's return for the fiscal year-end 2010 was 14.62%. The largest asset class exposures experienced positive returns for the fiscal year: total physical equity portfolio, 19.5%; the total physical fixed income portfolio, 14.5%; and the total alternatives portfolio, 13.6%. During the fiscal year, the Plan increased the cash exposure to 10.8%, which caused a drag on the Plan's overall return.

The Retirement System Investment Commission compares the portfolio's performance to two customized benchmarks: the Policy Benchmark and the Strategy Benchmark. The Policy Benchmark represents a hypothetical return that would occur if the portfolio's assets were invested passively (indexed) with the weights of each asset class consistent with the Policy Asset Allocation. The Strategy Benchmark uses the portfolio's actual weights. The difference between the returns of the Policy and Strategy Benchmarks represents the value added from the strategic decisions to deviate from the Policy Asset Allocation. Likewise, the difference between the Strategy Benchmark and the actual return represents the value added from manager selection.

The Plan's positive performance relative to the Policy and Strategy benchmarks was driven by a continued rally in the credit markets that was a result of dislocations caused by the financial crisis starting in 2008. In several cases, the RSIC increased its exposure to credit and decreased its exposure to assets with lower expected risk adjusted returns. The opportunistic credit portfolio returned 26.4% and the global fixed income portfolio returned 16.3% as of the fiscal year-end.

During fiscal year 2010, the total dollar amount of retirement annuities paid increased approximately 3 percent when compared with the previous fiscal year. This was primarily due to an increase in the number of annuitants. Early retirement incentives offered due to budget cuts and flexible return-to-work provisions for working retirees allow members to retire earlier than they otherwise would. COLAs have historically been a very important benefit to our retirees, providing a critical component of retiree income, especially during inflationary periods. Current South Carolina state statute provides that each July 1, eligible SCRS and PORS retirees should receive an automatic COLA equal to the percentage of the annual increase in the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should equal the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA is awarded when the CPI-W is negative. SCRS and PORS retirees did not receive a COLA in fiscal year 2010 as a result of a negative CPI-W.

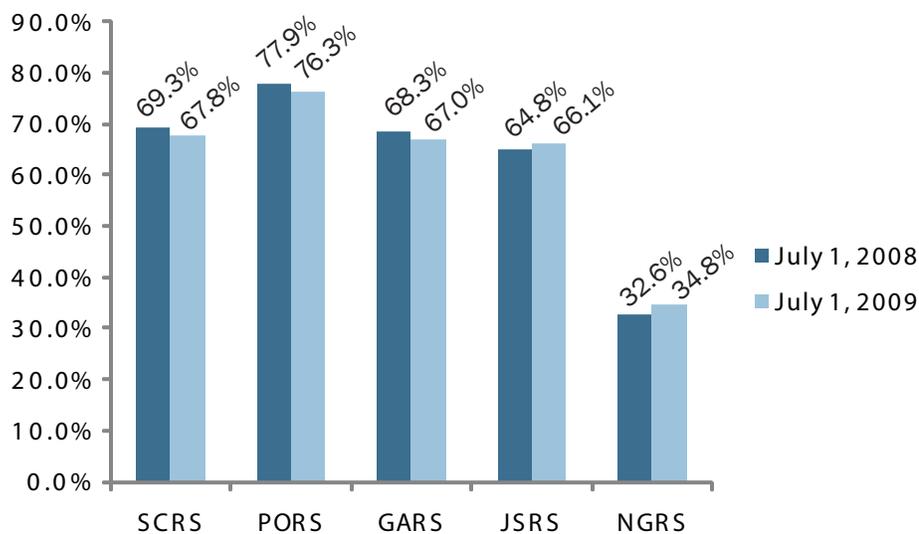

Funding Status

An overall objective in the funding of a defined benefit retirement plan is to accumulate sufficient funds to meet long-term benefit obligations. The primary sources of assets to fund benefits include investment income, member contributions and employer contributions. Beginning with investment performance for the fiscal year ended the June 30, 2008, a ten-year smoothing method technique is used to actuarially value assets. This asset valuation method mitigates the impact of market volatility and allows changes in market conditions to be recognized (smoothed) over a period of years. Excess returns and shortfalls determined prior to July 1, 2008, remain recognized over a five-year period.

Financial Section

The ratio of actuarial assets to actuarial liabilities provides an indication as to whether sufficient assets are accumulated to pay benefits when due; the greater the level of funding, the larger the ratio of actuarial assets to actuarial accrued liabilities. The most recent actuarial valuations prepared as of July 1, 2009, and adopted by the South Carolina Budget and Control Board indicate that the funded ratios of each of the five individual plans remained relatively stable from the previous valuations. As of July 1, 2009, funding levels of all the plans are such that annual contributions are sufficient for the valuation to find the plans in good actuarial condition. The changes in the funded ratios do not affect the availability of funds or resources for future use and actuarial projections indicate that unfunded liabilities will be amortized and funded within acceptable funding guidelines. The funded ratios of the five plans are presented in the following graph.

Funded Ratios
(Actuarial assets as a percentage of actuarial accrued liabilities)

South Carolina Retirement Systems

Notes to Financial Statements

I. Basis of Presentation and Summary of Significant Accounting Policies

Description of the Entity

The financial statements of the South Carolina Retirement Systems (Systems) presented herein contain the following funds:

Pension Trust Funds

- South Carolina Retirement System (SCRS)
- South Carolina Police Officers Retirement System (PORS)
- Retirement System for Members of the General Assembly of the State of South Carolina (GARS)
- Retirement System for Judges and Solicitors of the State of South Carolina (JSRS)
- National Guard Retirement System (NGRS)

Each pension trust fund operates on an autonomous basis; funds may not be utilized for any purpose other than for the benefit of each plan's participants.

The Retirement Systems are part of the state of South Carolina's primary government and are included in the *Comprehensive Annual Financial Report of the State of South Carolina*. In making this determination, factors of financial accountability, governance and fiduciary responsibility of the state were considered.

Plan Descriptions

The South Carolina Retirement System, a cost-sharing multiple-employer defined benefit pension plan, was established effective July 1, 1945, pursuant to the provisions of Section 9-1-20 of the South Carolina Code of Laws for the purpose of providing retirement

allowances and other benefits for public school districts and employees of the state and political subdivisions thereof.

The South Carolina Police Officers Retirement System, a cost-sharing multiple-employer defined benefit pension plan, was established effective July 1, 1962, pursuant to the provisions of Section 9-11-20 of the South Carolina Code of Laws for the purpose of providing retirement allowances and other benefits for police officers and firemen of the state and its political subdivisions.

The Retirement System for Members of the General Assembly of the State of South Carolina, a single-employer defined benefit pension plan, was created effective January 1, 1966, pursuant to the provisions of Section 9-9-20 of the South Carolina Code of Laws to provide retirement allowances and other benefits for members of the General Assembly.

The Retirement System for Judges and Solicitors of the State of South Carolina, a single-employer defined benefit pension plan, was created effective July 1, 1979, pursuant to the provisions of Section 9-8-20 of the South Carolina Code of Laws for the purpose of providing retirement allowances and other benefits for judges, solicitors, and circuit public defenders of the state.

The National Guard Retirement System, a single-employer defined benefit pension plan, was created effective July 1, 1975, and is governed by the provisions of Section 9-10-30 of the South Carolina Code of Laws for the purpose of providing supplemental retirement benefits to certain members who served in the South Carolina National Guard.

Financial Section

A summary of information related to participating employers who reported wages earned for active members during the fiscal year ended June 30, 2010, follows (dollar amounts expressed in thousands):

	<u>State¹</u>	<u>School</u>	<u>Other</u>	<u>Total</u>
SCRS				
Number of Employers	111	111	578	800
Annual Covered Payroll	\$ 2,280,108	\$ 3,229,690	\$ 1,906,975	\$ 7,416,773
Average Number of Contributing Members	55,753	86,691	56,648	199,092
PORS				
Number of Employers	63	49	311	423
Annual Covered Payroll	\$ 358,181	\$ 331	\$ 667,150	\$ 1,025,662
Average Number of Contributing Members	10,500	14	17,269	27,783
GARS				
Number of Employers	2			2
Annual Covered Payroll	\$ 3,226			\$ 3,226
Number of Elected Positions	170			170
JSRS				
Number of Employers	3			3
Annual Covered Payroll	\$ 16,573			\$ 16,573
Average Number of Contributing Members	144			144
NGRS				
Number of Employers	1			1
Annual Covered Payroll ²	N/A			N/A
Average Number of Active Members	12,447			12,447

¹Each State Agency is considered a separate employer for reporting purposes. Quasi-State Agencies and Institutions of Higher Education are reported in this category.

²Annual covered payroll is not applicable for NGRS because it is a non-contributory plan.

Based upon the most recent actuarial valuations dated July 1, 2009, and adopted by the Budget and Control Board, membership in the Systems was as follows:

	<u>SCRS</u>	<u>PORS</u>	<u>GARS</u>	<u>JSRS¹</u>	<u>NGRS</u>	<u>Totals</u>
Retirees and beneficiaries currently receiving benefits	108,014	11,950	353	184	3,785	124,286
Terminated members entitled to but not yet receiving benefits	156,999	11,832	40	4	2,786	171,661
Total active, elected positions, and other special contributing members	<u>192,319</u>	<u>26,598</u>	<u>198</u>	<u>144</u>	<u>12,599</u>	<u>231,858</u>
Total membership	<u>457,332</u>	<u>50,380</u>	<u>591</u>	<u>332</u>	<u>19,170</u>	<u>527,805</u>

¹Total for retirees and beneficiaries includes 14 participants who retired in place and continued to serve as a judge, solicitor, or circuit public defender pursuant to the provisions of Section 9-8-60 (7)(b) of the South Carolina Code of Laws.

Financial Section

Membership and benefit requirements are prescribed in Title 9 of the South Carolina Code of Laws. A brief summary of each is presented below.

Membership SCRS

Generally, all employees of covered employers are required to participate in and contribute to the system as a condition of employment. This plan covers general employees and teachers.

State ORP

As an alternative to membership in SCRS, newly hired state, public school, and higher education employees have the option to participate in the State Optional Retirement Program (State ORP), which is a defined contribution plan. State ORP participants direct the investment of their funds into a plan administered by one of four investment providers. The SCRS assumes no liability for State ORP benefits. Rather, the benefits are the liability of the investment providers. For this reason, State ORP programs are not considered part of the Systems for financial statement purposes.

Contributions to the State ORP are at the same rates as SCRS. A direct remittance is required from the employers to the investment providers for the employee contribution (6.50 percent) and a portion of the employer contribution (5 percent). A direct remittance is also required to the SCRS for a portion of the employer contribution (4.24 percent) and a death benefit contribution (.15 percent), which is retained by the SCRS. The activity for the State ORP is as follows:

State ORP Activity
Year Ended June 30, 2010
(Dollar amounts expressed in thousands)

Average Number of Contributing Participants	19,574
Annual Covered Payroll	\$949,398
Employer Contributions Retained by SCRS	40,254
Death Benefit Contributions Retained by SCRS	1,424
Employee Contributions to Investment Providers	61,711
Employer Contributions to Investment Providers	47,470

PORS

To be eligible for PORS membership, an employee must be required by the terms of his employment, by election or appointment, to preserve public order,

protect life and property, and detect crimes in the state; to prevent and control property destruction by fire; be a coroner in a full-time permanent position; or be a peace officer employed by the Department of Corrections, the Department of Juvenile Justice, or the Department of Mental Health. Probate judges and coroners may elect membership in PORS. Magistrates are required to participate in PORS for service as a magistrate. PORS members, other than magistrates and probate judges, must also earn at least \$2,000 per year and devote at least 1,600 hours per year to this work, unless exempted by statute.

GARS

All members of the Senate and the House of Representatives are required to participate in and contribute to the system upon taking office as a member of the South Carolina General Assembly.

JSRS

All solicitors, circuit public defenders, judges of a Circuit or Family Court and justices of the Court of Appeals and Supreme Court are required to participate in and contribute to the system upon taking office.

NGRS

Membership consists of individuals who serve in the South Carolina National Guard.

Pension Benefits SCRS

A monthly pension is payable at age 65 or with 28 years credited service regardless of age. Reduced pension benefits are payable at age 55 with 25 years of service credit. A member is eligible to receive a reduced deferred annuity at age 60 with five years earned service. Death benefits are also available to active and retired members who have at least one year of service, provided their employer participates in the program.

Each July 1, eligible SCRS retirees should receive an automatic cost-of-living adjustment (COLA) equal to the percentage of the annual increase in the CPI-W as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should equal the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods

Financial Section

of inflation, so no COLA will be awarded if the CPI-W is negative. Members who retire under the early retirement provisions at age 55 with 25 years of service are not eligible for COLAs until the second July 1 after reaching age 60 or the second July 1 after the date he would have had 28 years of service credit had he not retired.

PORS

A monthly pension is payable at age 55 with a minimum of five years earned service or with 25 years of service regardless of age. A member is eligible to receive a deferred annuity at age 55 with five years earned service. Death benefits are also available to members who have at least one year of service provided their employer participates in the program. An additional accidental death benefit is also offered to members killed in the line of duty while working for a covered employer.

Each July 1, eligible PORS retirees should receive an automatic cost-of-living adjustment (COLA) equal to the percentage of the annual increase in the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should be equal to the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA will be awarded if the CPI-W is negative.

GARS

A member is eligible for a monthly pension at age 60 or with 30 years credited service. A member who has attained age 70 or has 30 years of service is eligible to retire and draw an annuity while continuing to serve in the General Assembly. A member is eligible to receive a deferred annuity with eight years of service. A death benefit is also provided to members who have at least one year of service. Retirees receive increases in benefits based upon increases in the current salary of their respective active positions.

JSRS

A pension benefit is payable at age 70 with 15 years service, age 65 with 20 years service, age 65 with four

years in a JSRS position and 25 years other service with the state, 25 years service regardless of age for a judge or 24 years of service for a solicitor or a circuit public defender regardless of age. A judge is vested in the system after attaining 10 years of earned service in the position of judge, and a solicitor or a circuit public defender is vested in the system after attaining eight years of earned service. A member who has reached maximum eligibility is eligible to retire and draw an annuity while continuing to serve. A death benefit is also provided to members with at least one year of service.

Retirees receive increases in benefits based upon increases in the current salary of their respective active positions.

NGRS

A monthly pension is payable at age 60 provided the member was honorably discharged from active duty with at least 20 years of total creditable military service. Of the 20 years total creditable military service, at least 15 must have been served in the South Carolina National Guard. Additionally, the last 10 years of service must have been served in the South Carolina National Guard. No cost-of-living increases are provided to NGRS retirees.

Summary of Significant Accounting Policies

Fund Structure

The Systems' accounts are maintained in accordance with the principles of fund accounting. This is the procedure whereby resources for various purposes are classified for accounting and reporting purposes into funds that are in accordance with specified activities or objectives. Separate pension trust funds (fiduciary fund type) are used to account for the activities of the five public employee retirement systems administered by the Systems.

Adoption of New Accounting Pronouncement

During the year ended June 30, 2010, the Systems adopted GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. GASB 53 was issued to address the recognition, measurement, and disclosure of information regarding derivative instruments entered into by state and local governments.

Basis of Accounting

All funds are accounted for using the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred. Benefit and refund expenses are recognized when due and payable in accordance with the terms of the plan.

Administrative Expenses

The State Budget and Control Board's Office of Internal Operations maintains an internal service fund to account for the administrative costs of operating the Systems. All accounting and corresponding disclosures related to administrative expenses are the responsibility of the internal service fund administered by the Board. Administrative expenses are funded by both employer contributions and investment earnings and are assessed to each of the pension trust funds based on its respective portion of total assets in order to pay for actual expenses incurred during the year. Administrative expenses of the Systems include employee salaries and associated employee benefits, disability evaluations, fiduciary liability insurance and other professional service fees. In addition, the Retirement Systems Investment Commission, a separate State Agency charged with investing the trust fund assets, is funded entirely from the trust fund. Expenses for the Commission include salaries and benefits for both RSIC investment and administrative staff and other professional service fees.

Cash and Cash Equivalents

The Systems classifies cash on deposit in financial institutions and cash on deposit in the state's internal cash management pool as cash and cash equivalents. The Systems also classifies certain short-term highly liquid securities as cash equivalents if the date of maturity is three months or less from the date of acquisition.

Forward contracts and foreign currencies are also classified as cash and cash equivalents.

Contributions

Employee, employer, and state-appropriated contributions are recognized in the period in which they are due, pursuant to formal commitments as well as statutory requirements. Substantially all contributions receivable are collected within 30 days of year-end.

Investments

The Retirement System Investment Commission, created by the General Assembly in 2005 as fiduciary for the Retirement Systems, has exclusive authority for investing and managing all assets of the plan. Funds of the Systems are invested subject to the terms, conditions, limitations, and restrictions imposed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310 (B) and Title 9 Section 16 of the South Carolina Code of Laws. The funds and assets of the various state retirement systems are not funds of the State, but are instead held in trust as provided in Section 9-16-20.

The Investment Commission is structured as a separate state agency reporting to a group of Commissioners. Commission members are appointed and are comprised of six financial experts, including the State Treasurer and a nonvoting retired member. The Commission employs a chief investment officer who has oversight for complete management of the investment program for the Retirement Systems' \$22.7 billion pension trust fund. The Commission also retains an independent consultant to provide investment consulting services necessary to fulfill the duties for investing the Systems' portfolio.

As fiduciary on behalf of the Retirement Systems, the Commission enters into individual agreements with various investment managers to invest plan assets seeking superior long-term results at an acceptable level of risk. As of June 30, 2010, legal agreements were in place with 71 investment managers.

Financial Section

For financial statement purposes, investments of the pension trust funds are reported at fair value in the Statement of Plan Net Assets. Short term securities categorized as cash or cash equivalents are reported at fair value. The Systems holds domestic and global equity and fixed income securities which are traded on organized exchanges. These investments are valued by the investment custodian using the last reported sales price on a trade-date basis. Private market investments typically utilize a limited partnership structure and private equity funds normally represent investments in operating companies that are not publicly traded on a stock exchange. The fair values of limited partnership investments are based on valuations of the underlying companies of the limited partnerships. The fair values of alternative investments including private equity, opportunistic credit, real estate and certain other investments, where current market values are not readily ascertainable, are valued in good faith based on the most recent financial information available for the underlying companies and reported by the investment managers at the measurement date, adjusted for subsequent cash flow activities through June 30, 2010. The estimated fair value of these investments may differ from values that would have been used had a ready market existed.

Investments are combined in a commingled investment pool, with each system owning a percentage of the pool and receiving proportionate investment income in accordance with their respective ownership percentage. Investment income includes realized and unrealized appreciation (depreciation) in the fair value of investments, interest income earned, dividend income earned, less investment expense, plus income from securities lending activities, less deductions for securities lending expenses. Several of the alternative investment managers provide account valuations on a net of fee basis. Those management fees are netted against investment income and because they are not readily separable, amounts are recorded and reported net of fees in the net appreciation (depreciation) in the fair value of investments.

Capital Assets

Capital assets are capitalized at cost and depreciated on a straight-line basis over an estimated useful life of forty years.

II. Contributions and Reserves

Contributions to each of the Plans are prescribed in Title 9 of the South Carolina Code of Laws.

Plan members are required to contribute at statutorily established rates. The rates applicable for fiscal year 2010 follow:

SCRS	6.5% of earnable compensation
PORS	6.5% of earnable compensation
GARS	10% of earnable compensation
JSRS	10% of earnable compensation
NGRS	Non-contributory

Employer contributions are established by the State Budget and Control Board at the actuarially determined rates recommended by the Systems' actuaries.

Contributions for the NGRS are provided by state appropriations based on the annual required contribution determined by the Systems' actuary on an annual basis.

In accordance with provisions of the 2009-2010 State Appropriations Act, an additional employer contribution surcharge of 3.50 percent of covered payroll was added to the contribution rate applicable to state and local governments, and public school entities covered by the Employee Insurance Program. This assessment is for the purpose of providing retiree health and dental insurance coverage and is not a part of the actuarially established contribution rates for retirement funding purposes. Functioning as a collecting agent, SCRS and PORS collected (amounts expressed in thousands) \$246,576 and \$13,346 respectively in retiree insurance surcharges (\$33,174 of which was applicable to the State ORP) and remitted these funds to the Employee Insurance Program.

Financial Section

Net Assets of each plan are required to be reserved in the following accounts:

The **Employer Fund** is credited with all employer retirement contributions and investment earnings of the Employee and Employer Funds. Upon retirement, all member account balances and contributions are transferred to the Employer Fund as all annuities and administrative expenses of the Systems are paid from this fund. Annual state appropriations to the NGRS are also credited to the Employer Fund to provide funding for the payment of annuities and administrative expenses.

The **Employee Fund** is credited with all contributions made by active members of the Systems. Interest is credited to each member's individual account at an annual rate of 4 percent by transferring funds from the Employer Fund to the Employee Fund. At termination of employment prior to retirement, employee contributions and accumulated interest may be refunded from this fund to the member. At retirement, employee contributions and interest are transferred from the Employee Fund to the Employer Fund for subsequent payment of benefits.

The **Death Benefit Fund**, formerly referred to as the Group Life Fund, (SCRS and PORS only) is the fund to which participating employers contribute for the

purpose of providing a death benefit to active and retired members of the Systems. Employer contributions and investment earnings are credited to this fund. Death benefit payments and administrative expenses are paid from this fund.

The **Accidental Death Fund** (PORS only) is the fund to which participating employers contribute for the purpose of providing annuity benefits to beneficiaries of members of PORS killed in the actual performance of their duties. This fund and its benefits are independent of any other retirement benefit available to the beneficiary. Employer contributions and investment earnings are credited to this fund. Monthly survivor annuities and administrative expenses are paid from this fund.

The **Qualified Excess Benefit Arrangement (QEBA) Fund** is the fund from which annuity benefits are paid when a benefit recipient exceeds IRC Section 415(b) limits on the amount an individual may receive annually from a qualified defined benefit pension plan. Employer contributions are credited to this fund on an as-needed basis in an amount equivalent to the amount of benefits being paid out of the QEBA fund due to IRC Section 415(b) limitations.

Balances in the respective reserves at June 30, 2010, were as follows (amounts expressed in thousands):

	SCRS	PORS	GARS	JSRS	NGRS	Total
Employee Fund	\$ 6,222,854	\$ 758,695	\$ 7,265	\$ 17,816	\$ -	\$ 7,006,630
Employer Fund	13,358,249	2,038,239	25,505	93,410	15,053	15,530,456
Death Benefit Fund	100,034	23,904				123,938
Accidental Death Fund		30,636				30,636
Qualified Excess Benefit Arrangement Fund						
	\$19,681,137	\$ 2,851,474	\$ 32,770	\$ 111,226	\$ 15,053	\$22,691,660

III. Deposits and Investments

Deposit and Investment Risk Disclosures

The tables presented on Pages 43-46 include disclosures of credit and interest rate risk in accordance with Governmental Accounting Standards Board Statement 40 and are designed to inform financial statement users about investment risks which could affect the Systems' ability to meet its obligations. These tables classify investments by risk type, while the financial statements disclose investments by asset class. The table amounts were provided by the custodian bank and agree to the Statement of Plan Net Assets.

Custodial Credit Risk

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the Systems' deposits may not be recovered. As prescribed by South Carolina state statute, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks or savings and loan associations. These deposits are secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the state against loss in the event of insolvency or liquidation of the institution or for any other cause. Deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000 or collateralized with securities held by the state or its agent in the State Treasurer's name as custodian.

Under the Temporary Liquidity Guarantee Program provided by the FDIC to strengthen confidence and encourage liquidity in the banking industry, the Transaction Account Guarantee (TAG) Program provides separate unlimited FDIC coverage on the full balance of non-interest bearing checking accounts. This cover-

age is in addition to the recently increased FDIC coverage on other deposits of \$250,000. Wachovia services our public fund accounts and participated in the TAG program through December 31, 2009; therefore, all checking accounts and deposits are either included under the TAG program or the bank holds additional collateral above the \$250,000 FDIC requirement due to classification.

The total amount of the Systems' deposits at June 30, 2010, was as follows (amounts expressed in thousands):

	Carrying Amount
SCRS	\$ 23,001
PORS	2,966
GARS	45
JSRS	69
NGRS	18
Total	<u>\$ 26,099</u>

Actual bank balances at June 30, 2010, totaled \$60,459 (expressed in thousands).

Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. Investing for the Systems is governed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310(B) and Title 9 Section 16 of the South Carolina Code of Laws. Funds held in trust for the Retirement Systems may be invested and reinvested in a variety of instruments including, but not limited to, fixed income instruments of the United States, foreign fixed income obligations, swaps, forward contracts, futures and options, domestic and international equity securities, private equity, real estate, and fund of funds.

¹U.S. Government Treasuries includes Notes, Bonds, and Treasury Inflation Protected Securities (TIPS).

²Yankee Bonds are foreign bonds denominated in U.S. Dollars and are registered with the Securities and Exchange Commission (SEC) for sale in the United States.

Financial Section

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. While the Systems' have no formal interest rate risk policy, interest rate risk is managed within the portfolio using effective duration, which is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 50 basis point change in interest rates. It takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. Within the investment policy, operational guidelines specify the degree of interest rate risk taken versus the benchmark within each fixed income portfolio.

The Systems invests in mortgage-backed securities which are reported at fair value in the Statement of Plan Net Assets and are based on cash flows from principal and interest payments of the underlying mortgages. These securities are sensitive to prepayments, which are likely in an environment of declining interest rates, and thereby reduce the value of the security. The Systems invests in these securities to diversify the fixed income portfolio and minimize risk. Disclosures for interest rate risk at June 30, 2010, are noted below (amounts expressed in thousands):

<u>Investment Type</u>	<u>Fair Value</u>	<u>Effective Duration</u> (option adjusted duration)

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Systems. As a matter of practice, there are no overarching limitations for credit risk exposures within the overall fixed income portfolio. Each individual portfolio within fixed income is managed in accordance with operational guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality. A quality rating of lower than C is not permissible in any of the fixed income guidelines except in those circumstances of downgrades subsequent to purchase, in which case the investment manager is responsible for communicating the downgrade to the Commission's Consultant and Staff. The Systems' fixed income investments were rated by Moody's and are presented below:

South Carolina Retirement Systems Credit Risk - Moody's Quality Ratings June 30, 2010

¹Agency rating is assigned to securities issued by government sponsored enterprises such as Federal National Mortgage Association (FNMA), Federal Home Loan Banks (FHLB), Federal Home Loan Mortgage Corporation (FHLMC) and Federal Farm Credit Banks (FFCB) that do not have a credit rating. These enterprises have an implied guarantee by the U. S. Government.

² NR represents securities that were either not rated or had a withdrawn rating.

Financial Section

Concentration of Credit Risk – Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government’s investment in a single issuer. The Systems’ policy for reducing this risk is to comply with the Statement of Investment Objectives as amended and adopted by the Retirement System Investment Commission which states that “except that no limitations on issues and issuers shall apply to obligations of the U.S. Government and Federal Agencies, the domestic fixed income portfolio shall contain no more than 6 percent exposure to any single issuer.” As of June 30, 2010 there is no single issuer exposure within the portfolio that comprises 5 percent or more of the overall portfolio. Therefore, there is no concentration of credit risk.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Systems participates in foreign markets to diversify assets, reduce risk and enhance returns. Exposure to foreign investments has, to date, been achieved synthetically using financial futures, forwards and swaps. Currency forwards are used to manage currency fluctuations and are permitted by investment policy. Policy, however, forbids speculating in forwards and other derivatives.

The table below presents the Systems’ exposure to foreign currency risk in U.S. dollars as of June 30, 2010, (amounts expressed in thousands):

Currency	Cash & Cash Equivalents	Forward Contracts	Futures Contracts	Private Equity	Opportunistic Credit	Equity	Fixed Income
Australian Dollar	\$ (130)	\$ 14,606	\$ (2,066)	\$ -	\$ -	\$ -	23,140
Brazil Real		295					521
British Pound Sterling	(3,152)	91,933	(4,956)

Japanese Yen	(11,042)	115,479	(2,237)				
Totals	\$ (4,240)	\$ 260,043	\$ (18,737)	\$ 59,251	\$ 180,575	\$ 293	\$ 79,282

Derivatives

Derivatives are financial instruments whose value is derived from underlying assets or data. All of the Systems’ derivatives are considered investments. Derivatives generally take the form of contracts in which two parties agree to make payments at a later date based on the value of specific assets or indices. Through certain collective trust funds, the Systems may invest in various derivative financial instruments such as futures and options thereon; forward foreign currency contracts; options; interest rate, currency, equity, index, and total return swaps; interest-only strips; and CMOs to enhance the performance and reduce volatility. The Systems’ derivatives, consisting of futures, forward contracts and swaps directly managed by the Commission, are presented in the tables on pages 44-46.

To date, the primary reasons for the Commission’s use of derivative contracts have pertained to their ability to facilitate changes to the asset allocation of the total plan and for their low cost of implementation. The Commission uses derivatives for several reasons:

- **Asset Allocation:** In many cases, synthetic exposures (using derivatives) are placeholders until managers are hired and funded. In time, the Commission may substitute traditional managers for much of the synthetic

Financial Section

exposure currently in the portfolio. Efficient markets dictate that in some asset classes, synthetics are the best way to achieve exposure.

- Risk Management: Derivatives allow investors the ability to swiftly and efficiently increase or decrease exposures in order to manage portfolio risk.
- Cost: A synthetic (derivative) solution is often the least expensive way to gain exposure to an asset class or to manage portfolio risk. Derivatives are more beneficial in each of the three major measures of cost: commission costs, market impact of trading, and opportunity costs.

Futures are contractual obligations that require the buyer (seller) to buy (sell) assets at a predetermined date at a predetermined price. These contracts are standardized and traded on an organized exchange with gains and losses settled daily thereby minimizing credit and default risk. Gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets. To comply with the requirements of multiple exchanges, securities in the amount of \$182.442 million of various GNMA's were held in trust by the clearing brokers on June 30, 2010 to satisfy the required margin amount to establish the Systems' futures exposure.

The table below presents classification information on the Systems' derivatives at June 30, 2010 (amounts in thousands):

	Changes in Fair Value		Fair Value at 6/30/2010	
	Classification	Gain/(Loss)	Classification	Amount
Investment derivatives:				
Futures Contracts	Net appreciation/(depreciation)	\$ (78,529)	Alternative Investments	\$ (78,529)
Forward Contracts	Net appreciation/(depreciation)	9,438	Cash & Cash Equivalents	8,761
Swaps	Net appreciation/(depreciation)	(517,563)	Alternative Investments	(211,645)

As of June 30, 2010, the Systems had the following exposure via futures contracts (dollar amounts in thousands):

Futures Contracts	Expiration	Long/Short	Quantity	Notional Value*
MTF CAC40 10EU	July 2010	Long	807	\$ 34,024
EURX DAX INDEX	September 2010	Long	161	29,392

Total International Equity				474,660
EMINI S&P 500	September 2010	Long	16,248	834,010
Total Large Cap Equity				834,010
IMM MINI RUSL	September 2010	Long	1,763	107,155
IMM EMINI MDCP	September 2010	Long	4,330	307,430
Total Small Cap Equity				414,585
Total				\$ 1,723,255

*Notional value is the nominal or face amount that is used to calculate payments made on derivative instruments (futures, forwards, swaps, etc.). This amount generally does not change hands and is thus referred to as notional. The notional amount represents the economic equivalent to an investment in the physical securities represented by the derivative contract.

Financial Section

Forwards are contractual obligations that require the delivery of assets at a fixed price on a predetermined date. These contracts are “over-the-counter” instruments, meaning they are not traded on an organized

exchange. Currency forwards gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets.

As of June 30, 2010, the Systems had the following forward exposures, listed by counterparty (amounts expressed in thousands):

Broker	Notional Value	Base Gain/(Loss)	Base Exposure
JP Morgan Securities	\$ 52,557	\$ 1,459	16.67%
BNY Mellon NA	52,555	1,461	16.67%
HSBC Securities	52,552	1,464	16.67%
Bank of America	43,792	1,476	13.89%
Royal Bank of Canada	36,468	940	11.56%
Barclays	33,404	750	10.59%
State Street	24,856	500	7.88%
Societe Generale	19,150	711	6.07%
Totals	\$ 315,334	\$ 8,761	100.00%

The Systems has entered into various swap agreements to manage risk exposure. Swaps are “over-the-counter” (OTC) agreements to exchange a series of cash flows according to specified terms. The underlying asset can be an interest rate, an exchange rate, a commodity price or any other index.

Total return swaps are primarily used to efficiently achieve a target asset allocation. Exposures to an asset class are typically gained by paying a reference rate such as LIBOR, plus or minus a spread, in exchange for the risk and returns of a desired market index. Similarly, exposures can be reduced by receiving a reference rate in exchange for the economic risks and returns of an index.

Counterparty risk, or default risk, is the risk that a party will not honor its contractual obligations. The Systems seeks to actively manage its counterparty risk by thorough analysis and evaluation of all potential counterparties by investment staff and the independent overlay manager. Risk is further minimized through diversification among counterparties with high credit

ratings and collateralizing unrealized gains and losses. The Systems currently does not participate in a master netting agreement. Unrealized gains and losses are not netted across instrument types. At June 30, 2010, the Systems had no credit risk to counterparties because unrealized swap losses exceeded the collateral posted less transfers due on June 30, 2010. The Systems, however, does not anticipate any default in the contractual positions.

The table below reflects the counterparty credit ratings at June 30, 2010, for currency forwards and swap agreements (amounts in thousands):

Quality Rating	Forwards	Swaps	Total
AAA	\$ 940	\$ -	\$ 940
AA3	2,670	(89,715)	(87,045)
AA2	2,925	(46,432)	(43,507)
A2	1,476	1,591	3,067
A1	750	(77,089)	(76,339)
Total subject to credit risk	\$ 8,761	\$ (211,645)	\$ (202,884)

Financial Section

Swap market value (or notional value) is calculated based on the actual index value of the benchmark index multiplied by the number of index units. The index value is the level or price of the benchmark index. The index units were determined at commencement of the swap and are detailed in the term sheet. At June 30, 2010, the Systems held swaps as shown in the table below (amounts expressed in thousands):

Counterparty	Total Return Swaps	SCRS Pays	SCRS Receives	Maturity Date	Current Notional	Gain (Loss) Since Trade
BNP Paribas	MSCI EM Proxy	3 month LIBOR plus 20 bps	MSCI EM	9/17/2010	\$ 202,482	\$ 2,482
BNP Paribas	EAFE + Canada Proxy	3 month LIBOR minus 30 bps	MSCI EAFE + Canada	9/7/2010	130,161	(19,839)

Total Return Swap Exposures					\$ 2,894,617	\$ (279,335)

Alternative Investments

The Alternatives category includes exposure to private equity, global tactical asset allocation, absolute return, opportunistic credit, real estate, derivatives and strategic partnerships. Private equity investments are normally structured as limited partnerships. In this structure, the Systems is one of several limited partners, while the investment manager serves as the general partner. Investing in limited partnerships legally obligates the Systems to invest the committed amount until the investment is fully funded. All other asset classes within the Alternatives category may be housed in a variety of legal structures. The Systems established several strategic partnerships to gain access to the best ideas of the investment manager, to receive favorable economics, and to efficiently take advantage of market opportunities. Our investments within the strategic partnership accounts include allocations to private equity, opportunistic credit, real estate, absolute return strategies and cash. The Systems' allocation to opportunistic credit is designed to take advantage of the dislocations that have occurred in the credit markets. The Systems' intent is to access superior risk adjusted returns through a variety of different credit strategies.

Commitments

The Systems entered into commitment agreements with numerous investment managers for future funding of private equity limited partnerships and strategic partnerships. As of June 30, 2010, the Systems had committed to fund various private equity and opportunistic credit limited partnerships for an amount of \$2.043 billion (US dollars) and €256 million (Euros). The total unfunded commitment as of June 30, 2010, was \$1.175 billion (US dollars) and €92 million (Euros). In addition, the Systems had committed to fund various strategic partnerships for an amount of \$4.650 billion (US dollars) of which the unfunded commitment at June 30, 2010 was \$1.140 billion (US dollars). Subsequent to June 30, 2010, the Systems committed to fund an additional \$199 million (US dollars) resulting in a remaining commitment as of September 24, 2010 of \$2.208 billion (US dollars) and €85 million (Euros).

Securities Lending

Through a custodial agent, the Systems participate in a securities lending program whereby securities are loaned for the purpose of generating additional income. The Systems lends securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions. The market value of the required collateral must initially meet or exceed 102 percent of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral, and requires additional collateral if the collateral value falls below 100 percent.

There are no restrictions on the amount of securities that may be loaned. The types of securities available for loan during the year ended June 30, 2010, included US Government securities, US Government agencies, corporate bonds and equities. The contractual agreement with the Systems' custodial bank provides indemnification in the event the borrower fails to return the securities lent or fails to pay the Systems income distribution by the securities' issuers while the securities are on loan. Cash and US Government securities were received as collateral for these loans. The Systems cannot pledge or sell collateral securities without a borrower default. The Systems invests cash collateral received; accordingly, investments made with cash collateral appear as an asset. A corresponding liability is recorded as the Systems must return the

cash collateral to the borrower upon the expiration of the loan.

At June 30, 2010, the fair value of securities on loan was \$416.568 million. The fair value of the invested cash collateral was \$324.593 million. Securities lending obligations at June 30, 2010, were \$429.065 million with the unrealized loss in invested cash collateral of \$104.472 million reflected under "Other Liabilities" on the Statement of Plan Net Assets and recorded in the Statement of Changes in Plan Net Assets under "Net appreciation (depreciation) in fair value of investments." The Commission evaluates the securities lending program in order to minimize risk, enhance performance and ensure a cost effective fee structure is in place.

With regard to custodial credit risk, the Systems' cash collateral invested is held by the counterparty and is uninsured. All securities loaned can be terminated on demand by either the Systems or the borrower. At year end the average number of days the loans were outstanding was one day. The average weighted maturity of investments made with cash collateral was 22 days. At June 30, 2010, there had been no losses resulting from borrower defaults and the Systems had no credit risk exposure to borrowers because the amounts the Systems owed the borrowers exceeded the amounts the borrowers owed the Systems.

Financial Section

The following table presents the fair value (amounts expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2010.

	June 30, 2010					June 30, 2009	
	SCRS	PORS	GARS	JSRS	NGRS	TOTALS	TOTALS

V. Transfers Between Systems

Transfers between systems are statutorily authorized transfers of contributions and service credit from one retirement system to another retirement system that result from members voluntarily initiating the transfer when certain conditions are met.

Transfers made during the fiscal year ended June 30, 2010, were as follows (amounts expressed in thousands):

Transfers from	<u>Transfers to</u>					<u>Totals</u>
	<u>SCRS</u>	<u>PORS</u>	<u>GARS</u>	<u>JSRS</u>	<u>NGRS</u>	
SCRS	\$ -	\$ 1,266	\$ 36	\$ 114	\$ -	\$ 1,416
PORS

JSRS						
NGRS			1			1
Totals	<u>\$ 3</u>	<u>\$ 196</u>	<u>\$ 1</u>	<u>\$ 67</u>	<u>\$ -</u>	<u>\$ 267</u>

VI. Related Party Transactions

The pension plans provide pension and other fringe benefits to employees of all state agencies. Revenues attributed to these agencies are recorded in the financial statements as employee and employer contributions and constitute approximately 33 percent of combined contribution revenues. In addition, the Systems receives custodial and related services from the State Treasurer.

At June 30, 2010, liabilities of approximately \$38.4 million were due to other state departments and agencies, and contributions receivable of approximately \$32 million were due from other state departments and agencies.

The National Guard Retirement System received state-appropriated contributions of just over \$4 million during the fiscal year.

The Retirement System Investment Commission was established in 2005 and is considered a separate state agency; however, the expenses of the Commission are funded by transfers from the Systems. Transfers in the amount of approximately \$3.8 million were made to the Commission during the fiscal year.

VII. Deferred Retirement Option Plans

The Teacher and Employee Retention Incentive (TERI) program, implemented effective January 1, 2001, is a deferred retirement option plan available to active SCRS members eligible for service retirement on or after January 1, 2001. When a member enters TERI, the member's status changes from an active member to a retiree even though the employee continues to work at his regular job and earn his regular salary for a period of up to five years. TERI participants who entered the program after June 30, 2005, must continue to contribute at the same rate as active members. Those who entered prior to July 1, 2005, make no employee contributions while participating in TERI. No additional service credit is earned during this period and participants are ineligible for disability retirement benefits. During the TERI participation period, the retiree's monthly benefits are accrued and accumulate in the trust account. Upon termination of employment or at the end of the TERI period (whichever is earlier), the retiree may elect to roll over his funds into a qualified, tax-sheltered, retirement plan or to receive a single-sum distribution (or a combination thereof). No interest is paid on the participant funds accumulated in the TERI account.

A total of 5,641 members were actively participating in the TERI program at June 30, 2010. The activity for this program is reflected in the following schedule:

Schedule of TERI Activity
Year Ended June 30, 2010
(Amounts expressed in thousands)

Beginning Liability Balance	\$ 430,805
Additions	156,800
TERI Distributions	(265,255)
Ending Liability Balance	<u>\$ 322,350</u>

A deferred retirement option program has also been established under the Retirement System for Judges and Solicitors (JSRS). A member who has not yet reached the age of 60 years, but who is eligible to retire and receive the maximum monthly benefit, may continue to serve as a judge, a solicitor, or a circuit public defender. The member's normal monthly retirement benefit is deferred and placed in the system's trust fund on behalf of the member. Upon reaching the age of 60 years, the balance of the member's deferred retirement benefit is distributed to the member. As of June 30, 2010, three JSRS members were participating in the deferred retirement option program and benefits held in trust totaled \$743,000.

Financial Section

VIII. Funded Status and Funding Progress - Pension Trust Funds

The funded status of each defined benefit pension plan as of July 1, 2009, the most recent actuarial valuation date, is as follows (dollar amounts expressed in thousands):

System	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) -Entry Age (b)	Unfunded AAL (UAAL) (b - a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b - a)/c)
SCRS	\$ 25,183,062	\$ 37,150,315	\$ 11,967,253	67.8%	\$ 7,761,808	154.2%
PORS	3,482,220	4,564,111	1,081,891	76.3%	1,084,154	99.8%
GARS	45,891	68,491	22,600	67.0%	3,854	586.4%
JSRS	141,797	214,363	72,566	66.1%	18,661	388.9%
NGRS	18,600	53,421	34,821	34.8%	N/A	N/A

The schedules of funding progress, presented as required supplementary information (RSI) following the notes to the financial statements, present multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the AALs for benefits.

Additional information as of the latest actuarial valuation follows:

Summary of Actuarial Methods and Significant Assumptions

	SCRS	PORS	GARS	JSRS	NGRS
Valuation date	07/01/09	07/01/09	07/01/09	07/01/09	07/01/09

Remaining amortization period	30 years	30 years	16 years	16 years	23 years
Asset valuation method	10-year smoothed market	10-year smoothed market	10-year smoothed market	10-year smoothed market	10-year smoothed market
Actuarial assumptions:					
Investment rate of return	8%	8%	8%	8%	8%
Projected salary increases	4.00% - 8.00%	4.50% - 11.50%	None	3.25%	None
Includes inflation at	3.00%	3.00%	3.00%	3.00%	3.00%
Cost-of-living adjustments	Automatic 2% ¹	Automatic 2% ¹	None	3.25%	None

¹Beginning the July 1st following one year of receiving benefits, the monthly benefit amount will increase by the calendar year change in CPI but not to exceed 2 percent. No COLA paid during deflation or when CPI is negative. Additional ad hoc COLAs may be paid as approved by the State Budget and Control Board and based upon the financial condition of the System.

IX. Death Benefit Program

In addition to monthly pension benefits provided through the Retirement Systems, a Death Benefit Program is available to employers. For participating employers, death benefits are provided for active and retired members. These benefits are funded through separate death benefit programs for SCRS and PORS on a cost-sharing, multiple-employer basis. Coverage is provided to eligible active and retired working members as well as non-working retirees under the governing statute. Funding for the plans is collected as a percent of covered payroll as determined by the Systems' actuary and approved by the Budget and Control Board. The current employer contribution rates for the programs are 0.15 percent and 0.20 percent of payroll for SCRS and PORS respectively. These contributions fund both the active and retiree death benefits.

Active Death Benefits

Upon the death of an SCRS or PORS contributing member in service who had at least one full year of membership or who died as a result of an injury arising in the course of performing his duties regardless of length of membership, a death benefit equal to the annual earnable compensation of the member at the time of death is payable apart and separate from the payment of pension benefits.

Retiree Death Benefits

Retired members of SCRS and PORS whose last employer prior to retirement is covered by the program, and who met applicable service credit requirements, are also protected under the state-sponsored death benefit program. Upon the death of a retired member, the beneficiary of a non-working retiree will receive a benefit payment based on the member's total creditable service at the time of retirement. As of the most recent actuarial valuation dated July 1, 2009, 67,357 non-working retired participants were covered under the SCRS program and 8,162 were covered under the PORS program.

<u>Years of Service Credit</u>		<u>Death Benefit</u>
<u>SCRS</u>	<u>PORS</u>	
10 to 19	10 to 19	\$2,000
20 to 27	20 to 24	\$4,000
28 or more	25 or more	\$6,000

Members who work after retirement by either participating in the TERI program or by returning to covered employment as a working retiree are eligible for an increased level of death benefits. Beneficiaries of working retirees are provided with a death benefit equal to the amount of the member's annual earnable compensation in lieu of the standard \$2,000, \$4,000 or \$6,000 retired member benefit.

Certain parameters are required for determining the actuarial funded status of the program and the calculation of the annual required contribution necessary to amortize any unfunded liability. Accordingly, additional reporting and disclosures for financial statement purposes are presented. Cavanaugh Macdonald Consulting, LLC, the Systems' actuary, performed separate actuarial valuations for the SCRS and PORS retiree death benefit programs as of July 1, 2009. The valuations determined the actuarial accrued liabilities and the required funding necessary to support the retiree death benefit program. Of the 0.15 percent death benefit contribution collected for SCRS, 0.045 percent represents the annual required contribution for the retiree portion. Under PORS, 0.021 percent of the 0.20 percent death benefit contribution is attributable to the retiree portion.

X. Litigation

In addition to the litigation mentioned below, controversies or disputes between the South Carolina Retirement Systems and its members arising out of the provisions of Title 9 of the South Carolina Code of Laws (Retirement provisions) are resolved through the “South Carolina Retirement Systems Claims Procedures Act” established by S.C. Code Ann. §§9-21-10 et seq. Claims brought pursuant to the Claims Procedures Act generally involve matters pertinent to the individual member or beneficiary. Claims may not be brought on behalf of a class under the Claims Procedures Act.

Ahrens et al. v. the South Carolina Retirement System, the South Carolina Retirement System and the State of South Carolina. This case is a class action case alleging that provisions in Act No. 153 of the Acts and Joint Resolutions of the General Assembly for the year 2005 (“Act No. 153”) requiring working retirees in the South Carolina Retirement System (“SCRS”) to make employee contributions are unconstitutional and illegal. A circuit court judge has certified the class in this case and issued an order on the merits in the matter granting the Plaintiffs relief based on the equitable theory of estoppel. The circuit court denied all other claims for relief made by the Plaintiffs, including their contract causes of action. The Retirement Systems and the State of South Carolina have appealed the circuit court’s order to the South Carolina Supreme Court. As of June 30, 2010, the Retirement Systems had collected approximately \$44.5 million in the form of retirement contributions from members of the South Carolina Retirement System who retired prior to July 1, 2005 and returned to work (note: not all working retirees meet the class definition). If the Plaintiffs were to ultimately prevail, most, if not all of these contributions could be refunded to the members and no future contributions could be collected from many, if not all, of the class members. The Retirement Systems and the State of South Carolina believe their appeal is meritorious and are vigorously contesting these claims and pursuing all appellate options.

Arnold et al. v. the South Carolina Police Officers Retirement System, the South Carolina Retirement System and the State of South Carolina. This case is a class action case filed on August 9, 2005, alleging that provisions in Act No. 153 of the Acts and Joint Resolutions of the General Assembly for the year 2005 (“Act No. 153”) requiring working retirees in the Police Officers Retirement System (“PORS”) to make employee contributions are unconstitutional and illegal. This is the companion case of the Ahrens case above. The same circuit court judge in Ahrens heard the case and has certified the class in this case and issued an order on the merits in the matter granting the Plaintiffs relief based on the equitable theory of estoppel. The circuit court denied all other claims for relief made by the Plaintiffs, including their contract causes of action. The PORS and the State of South Carolina have appealed the circuit court’s order to the South Carolina Supreme Court. As of June 30, 2010, the Retirement Systems had collected approximately \$14.3 million in the form of retirement contributions from members of the Police Officers Retirement System who retired prior to July 1, 2005 and returned to work (note: not all working retirees meet the class definition). If the Plaintiffs were to ultimately prevail, most, if not all of these contributions could be refunded to the members and no future contributions could be collected from many, if not all, of the class members. The Police Officers Retirement System and the State of South Carolina believe their appeal is meritorious and is vigorously contesting these claims and pursuing all appellate options.

Hutto, et al v. The South Carolina Retirement System, et al. This putative class action was filed in federal court in August, 2010. It seeks relief based on causes of action similar to those that were raised and disposed of in the *Ahrens* and *Arnold* cases described above. The plaintiffs in *Hutto* all retired after Act 153 was enacted and thus were on notice that they would pay retirement contributions if they chose to return to work. Defendants have filed a motion to dismiss the com-

Financial Section

plaint on numerous grounds. No hearing has been scheduled on this motion, and it is too early to offer any opinion about the potential outcome of this case. As of June 30, 2010, the Retirement Systems had collected approximately \$71.5 million in the form of retirement contributions from members of the Retirement Systems who are retired and returned to work on or after July 1, 2005. The Client intends to vigorously defend this matter.

¹Aronson + Johnson + Ortiz, LP, was funded September 2006. The manager's fee is calculated strictly on performance based on annualized returns and includes no base fee. No fees are payable until after the first three full calendar quarters.

²Manager hired during fiscal year 2010.

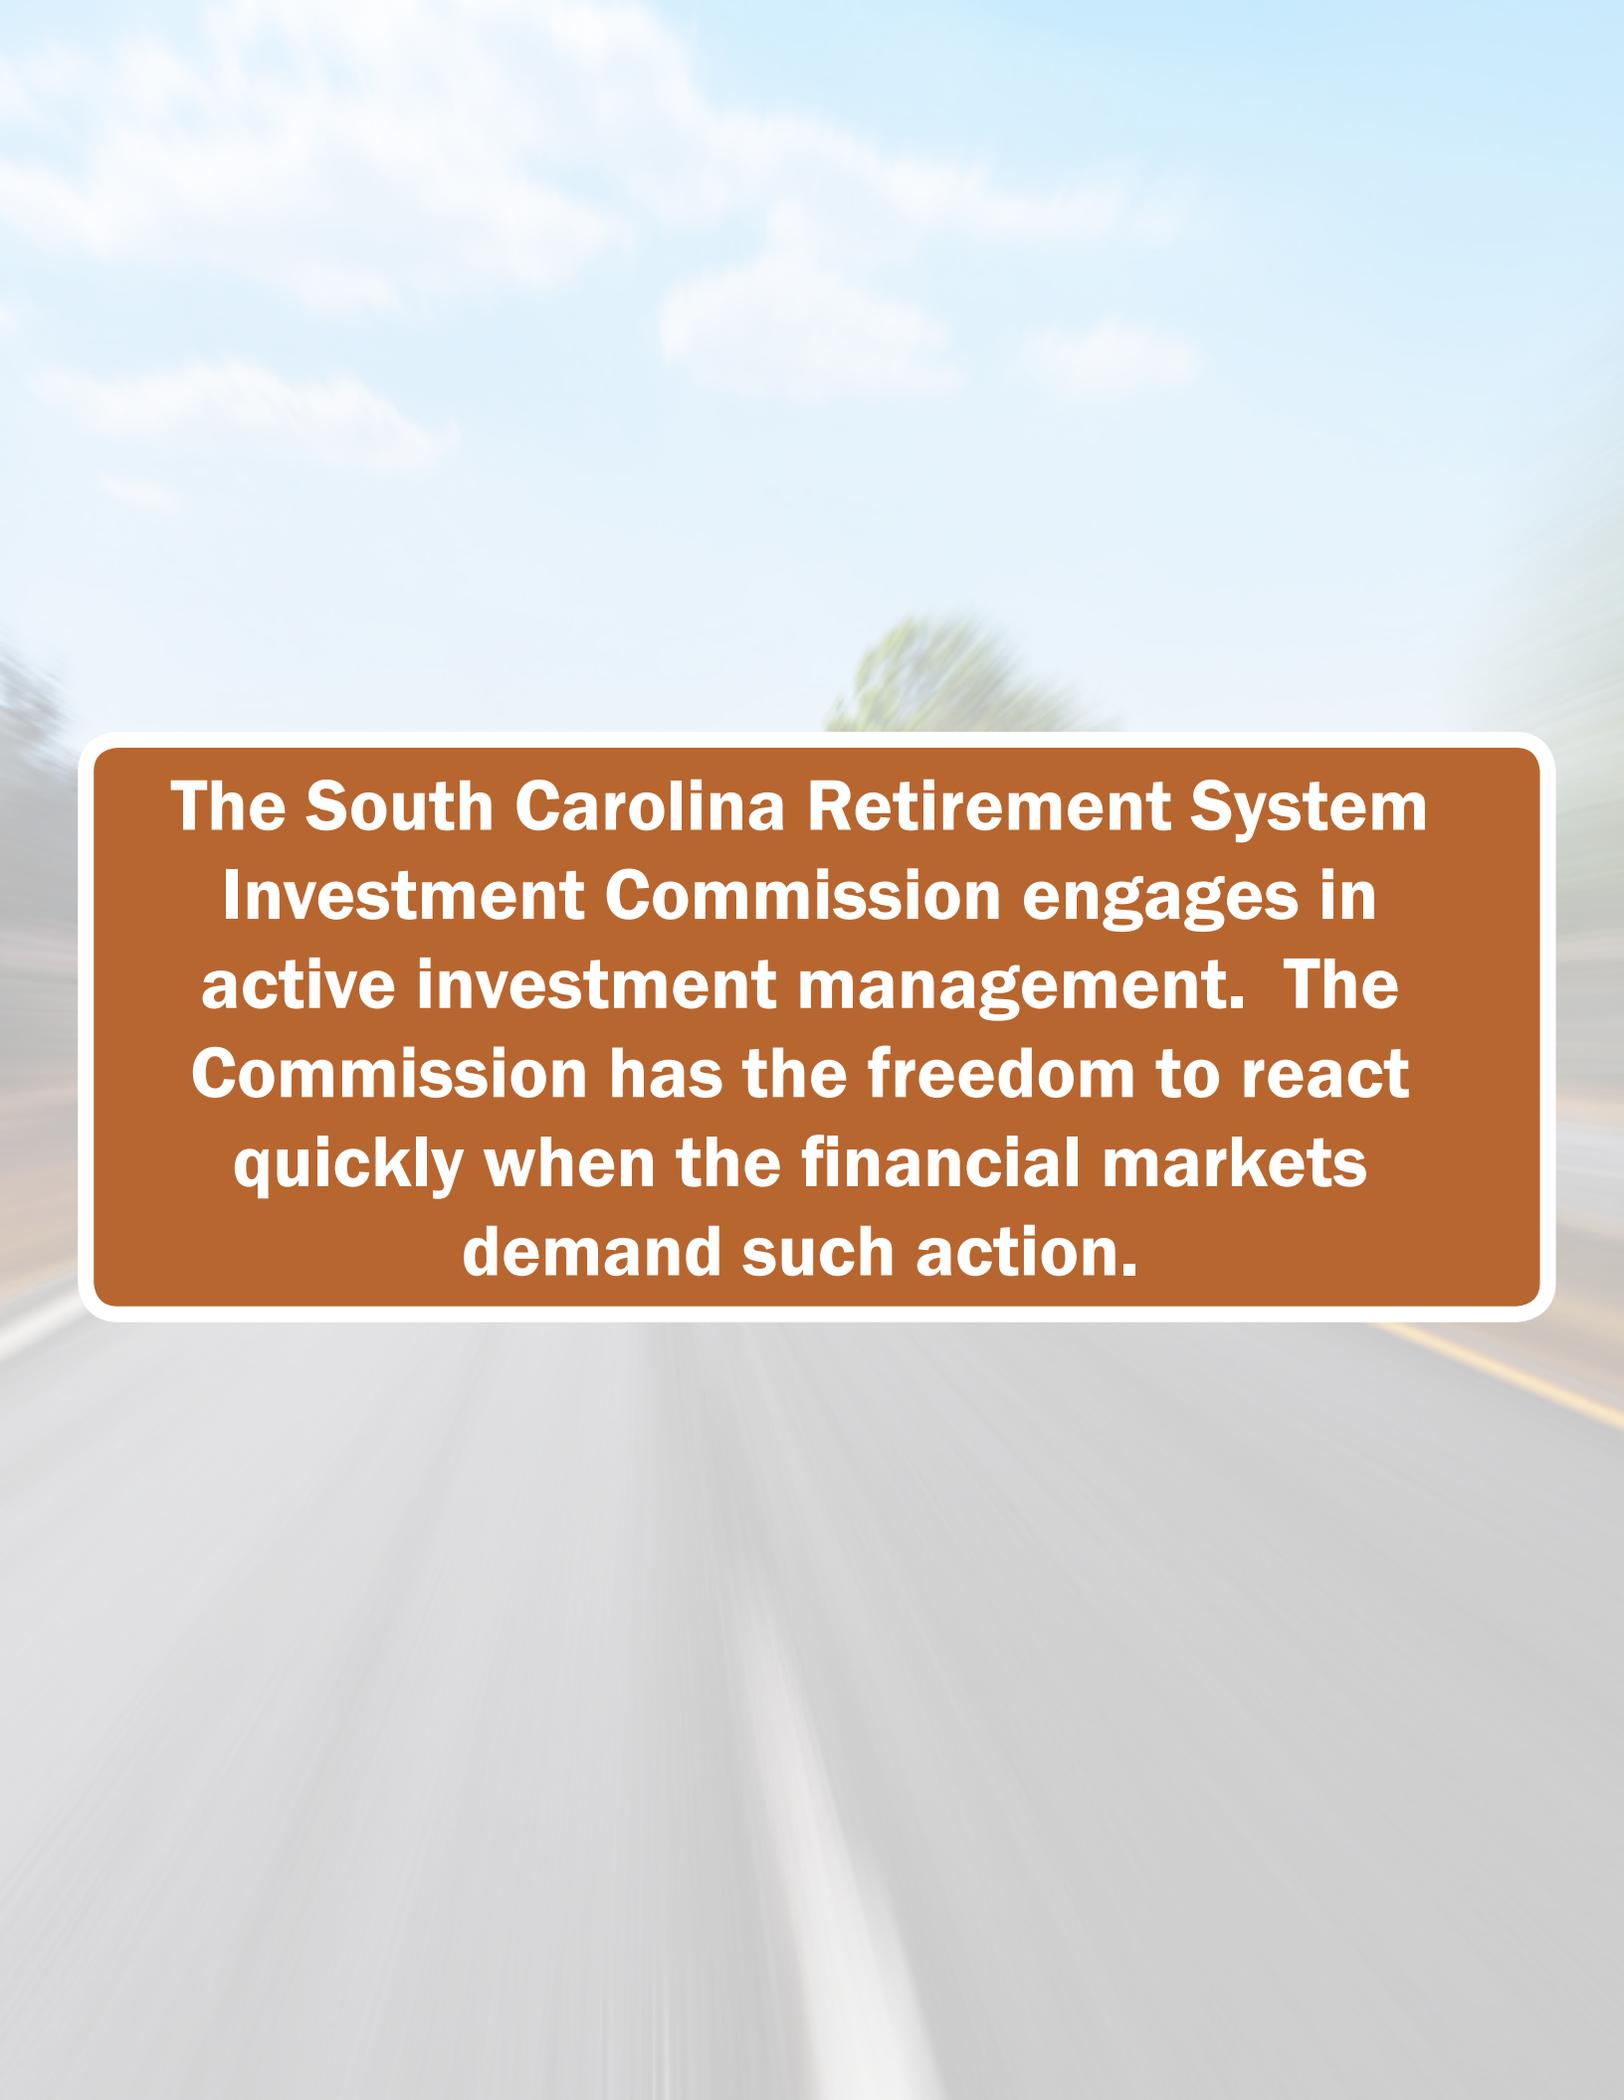

³Contract terminated during fiscal year 2010.

⁴Morgan Stanley assets were transitioned into the Hedge Fund subaccount of the SCRS/Morgan Stanley Partnership during fiscal year 2010.

*Several of the alternative investment managers provide account valuations on a net of fee basis. Management fees are netted against investment income and because they are not readily separable for specific investment income, amounts are recorded and reported net of fees.

November 30, 2010

The Honorable Mark Sanford, Governor
Budget and Control Board
State of South Carolina
Members of the General Assembly of South Carolina

Dear Ladies and Gentlemen:

It is our pleasure to provide the report on the investments of the portfolio of the South Carolina Retirement Systems (Retirement System) by the Retirement System Investment Commission (RSIC or Commission). In 2005, the RSIC was created as a fiduciary for the South Carolina Retirement Systems to assume full responsibility of investing and managing all assets of the Retirement System.

Capital Market Summary

The massive intervention by central banks around the globe throughout 2008 and 2009 appears to have stymied the economic erosion, as fears of a global depression abated and market volatility declined from its peak in late 2008. The recovery, however, has been aided by higher debt-to-GDP ratios in many developed countries, resulting in expectations of anemic growth in these economies. This has raised concerns of a potential “double dip” recession in 2011. Despite this looming economic uncertainty, global capital market asset values continued to experience a robust recovery as interest rates remained low and the residual positive effects of stimulus packages persisted.

For fiscal year ending (FYE) 2010, the High Yield market was the best performing asset class returning 26.8% as measured by the Barclays Capital U.S. High Yield index; and the NCREIF Property Index (Real Estate) was the worst performing, falling 1.5%. Within other fixed income markets, Emerging Market Debt was up 18.4%, while Core Fixed Income returned 9.5%. Equity markets were lead by Mid-Cap, Small-Cap and Emerging Market indices, each up over 20%. Large cap U.S. stocks (S&P 500 Index) were up 14.4% and Developed International equity markets (MSCI EAFE Index) gained 6.4%.

FYE 2010 Investment Performance Review

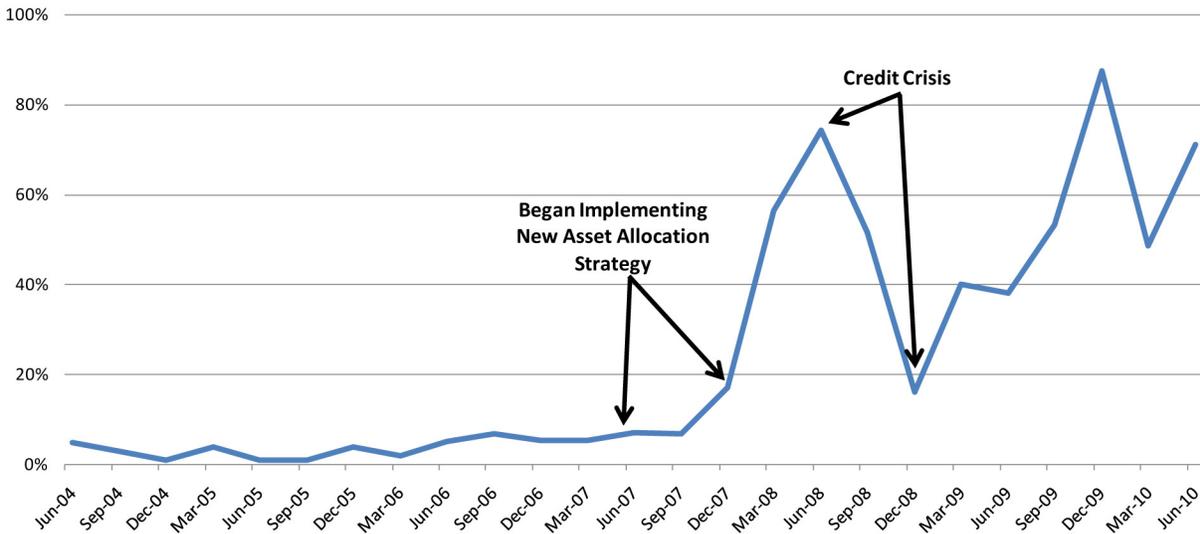

The Retirement System’s Investment Portfolio (Portfolio) returned 13.8%, net of fees, for FYE 2010, exceeding the Policy benchmark return of 10.6% by 3.2%. As of FYE 2010, the Portfolio’s market value was \$22.9 billion, up from \$21.0 billion a year earlier. The net increase of \$1.9 billion included the impact of \$899 million of net cash outflows for retiree obligations. The Portfolio’s positive performance relative to the Policy and Strategy Benchmarks was primarily due to superior manager performance.

Investment Section

When compared to other large pension plans, the Portfolio's return for the fiscal year was in the 71st percentile, up from the prior year and greatly improved over previous periods. It is important to note that the Portfolio accomplished this with substantially less equity risk and a higher cash allocation than the average public pension fund (source: Callan Associates).

RSIC Rolling 1-Year Percentile Rank as of June 30, 2010*

* The percentile rankings represent the RSIC's mean ranking taken from up to five separate peer group universes in which 100 is best and 1 is worst.

The RSIC's decision last year to shift to a lower risk portfolio with a higher amount of credit-oriented strategies worked better than expected. The RSIC's Opportunistic Credit portfolio was the strongest performer (up 23.3% in aggregate), while the Hedge Fund portfolios were the weakest performers (still up 9.1% in aggregate). On a relative basis, the Global Fixed Income portfolio was the top performer, up 15.7% compared to the Barclays Capital Global Aggregate Index return of 5.0%, creating 10.7% of excess return.

Asset Allocation Targets

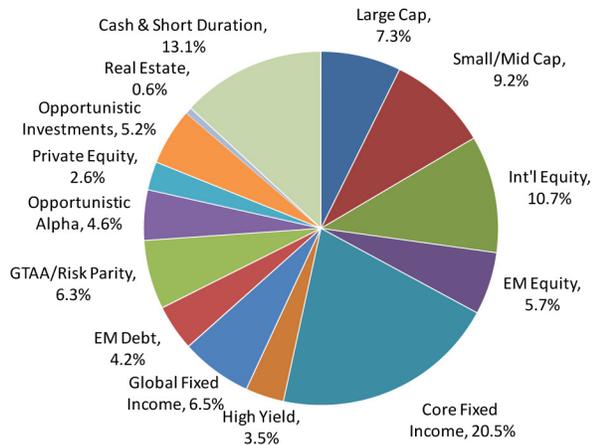

The asset allocation targets were unchanged during the year. The Portfolio's target equity allocation continues to be much lower than most other public pension funds for two reasons. First, this significantly reduces the Portfolio's dependence upon the performance of equity markets, thus improving the risk profile through diversification. Second, in early 2009 the RSIC recognized an opportunity to earn equity-like returns with far less risk by investing in certain fixed income investments. In retrospect, this is precisely what has occurred. The RSIC's allocations to High Yield, Global Fixed Income, Emerging Market Debt, and Opportunistic Credit each outperformed the S&P 500 during the year.

Similarly, the RSIC determined that the real estate market was likely to underperform during the year. Consistent with this view, the Portfolio had very little exposure (less than 1% of assets) to Real Estate throughout the year. This was the only asset class with a benchmark (NCREIF Property Index) that posted a negative return during the year. Due to the extent of the decline in recent years, the RSIC has

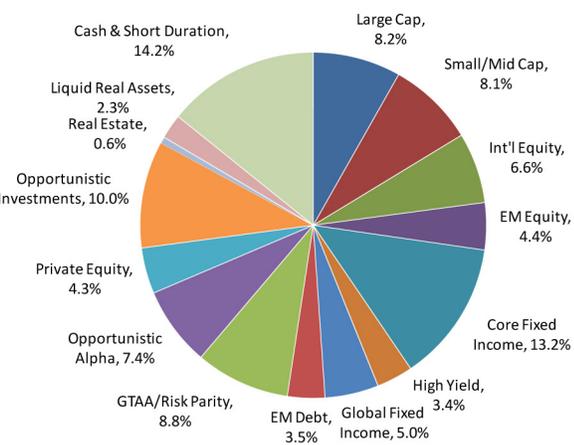

Investment Section

recently begun to prioritize investments in Real Estate as the market has started to show signs of a recovery.

Portfolio Exposure as of June 30, 2009*

Portfolio Exposure as of June 30, 2010*

* Private Equity and Opportunistic Investments exposures are rounded for presentation purposes.

Strategic Planning

In 2009 the Commission approved a three-year strategic plan, which identified a series of goals that are critical elements in building a best-in-class investment management organization. These goals are detailed in the 2009-2010 *Annual Investment Report*, along with the RSIC's mission, vision, and values statements.

Looking Ahead

While Fiscal Year 2010 produced strong, double-digit returns for most financial markets, our expectations are for relatively modest returns over the next several years. We believe that the best opportunities to achieve higher returns will be through significant investment in private markets, real estate, and emerging markets. Additionally, we intend to increase our emphasis on controlling the total cost of the Portfolio.

We are committed to serving the best interests of the participants and beneficiaries of the Retirement System, and we will continue to manage the assets of the Portfolio in a prudent and transparent manner, seeking superior returns at acceptable levels of risk. It is a tremendous responsibility and opportunity for us to serve as the Investment Commission's Chairman and CEO/CIO.

Sincerely,

Allen Gillespie, CFA
Chairman

Robert L. Borden, CFA, CAIA

¹Barclays PLC purchased Lehman Brothers Holdings Inc's benchmark service in 2008, and subsequently changed the beginning of the index names from "Lehman Brothers" to "Barclays Capital."

²Venture Economics benchmark is reported one quarter in arrears.

³Measure of the Consumer Price Index (CPI) - All urban Consumers (all items) represents the year-over-year changes in prices of all goods and services purchased for consumption by urban households and includes expenditures by urban wage earners and clerical workers, professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. This represents about 80 percent of the total U.S. population and is the broadest, most comprehensive measure of changes in prices of goods and services.

⁴Calculations were prepared using a time-weighted, rate of return calculation and follows the Bank Administration Institute's recommendations on cash flows. No returns are stated for periods of time for which the Systems was not invested in specific markets.

⁵Effective July 1, 2004, a two percent (approximately) portion of the aggregate fixed income portfolio was segmented into a liquidity pool of short duration investments to more efficiently manage cash flows.

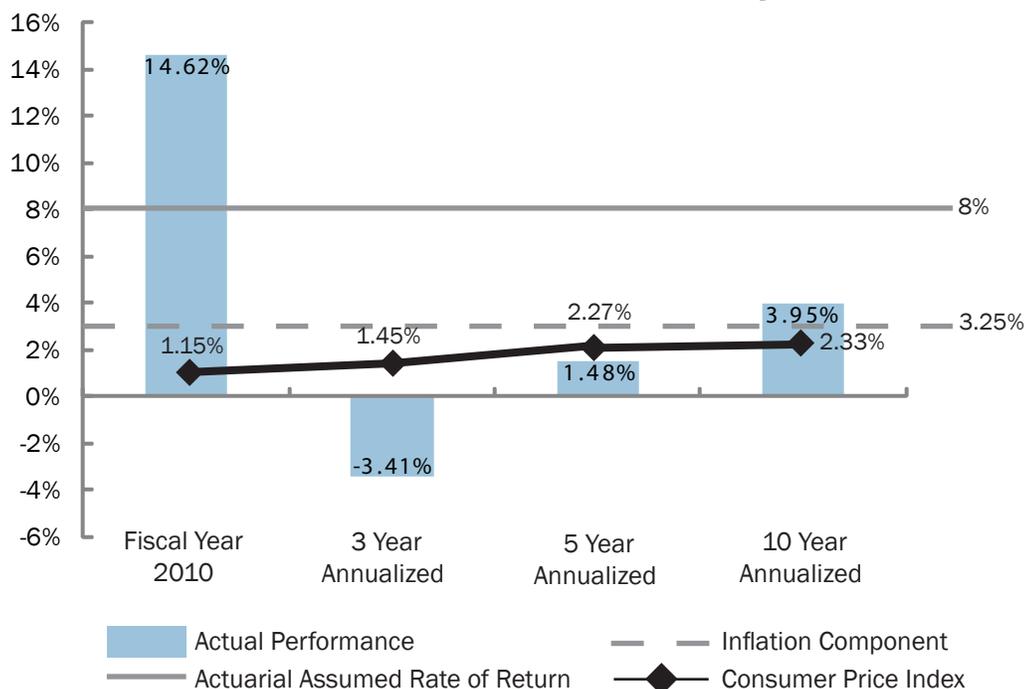

⁶Separate performance results were not reported for FY 2008, FY 2009 or FY 2010 for the Non U.S. Equity segment because this segment was initially funded during FY 2008 and was terminated during FY 2009.

⁷The returns generated from the synthetic allocations to Domestic Fixed Income, Domestic Equity, and Non U.S. Equity are reflected in the Total Portfolio returns, but they are not specifically included in the individual corresponding asset classes.

⁸Fiscal year 2009 performance was adjusted for a securities lending loss that was recognized in fiscal year 2009 for financial statement purposes. This adjustment resulted in total performance being restated from -19.04% to -19.60%.

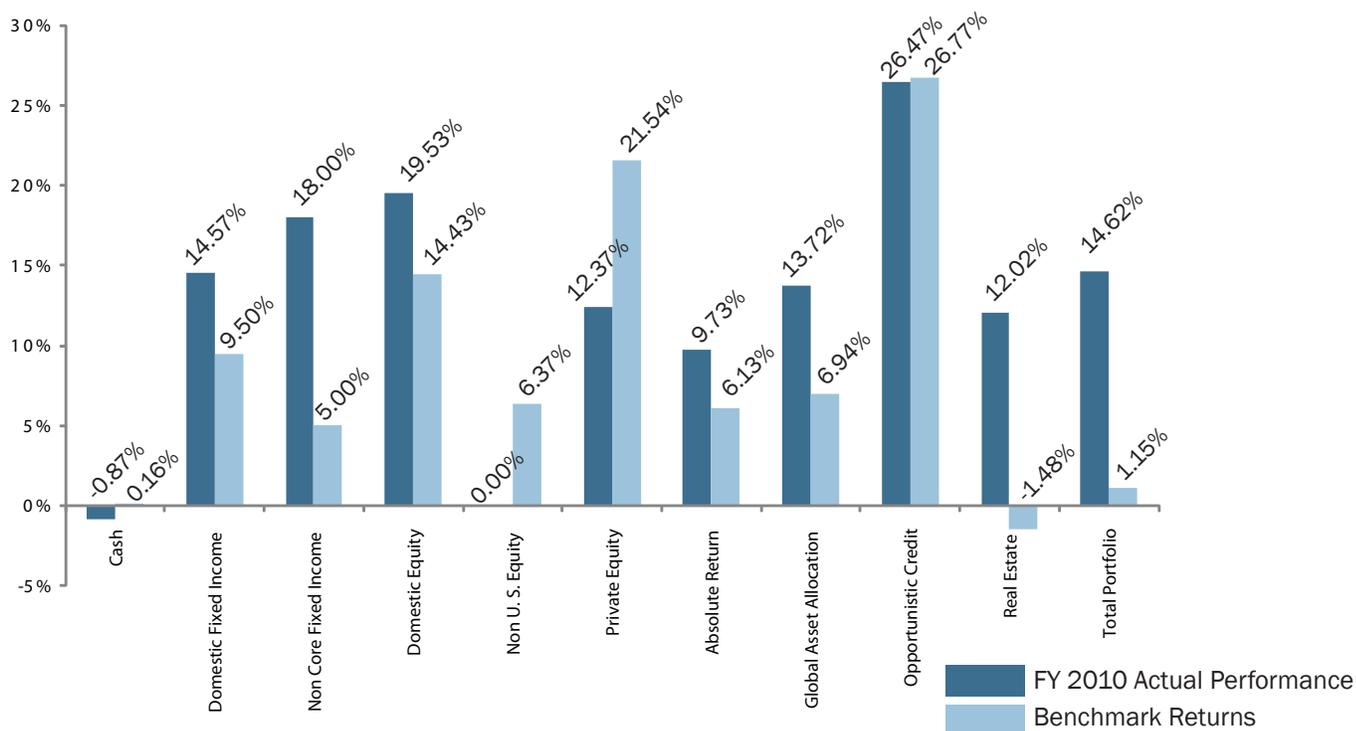

Investment Section

South Carolina Retirement Systems Investment Performance Summary

Note: The actuarial assumed rate of return is 8 percent starting with returns after July 1, 2008 and is composed of an assumed 3 percent inflation rate and a 5 percent real rate of return, net of investment and administrative expenses.

Fiscal Year 2010 Investment Performance by Market Segment

Note: The South Carolina Retirement System Investment Commission (RSIC) adopted an asset allocation model in April 2009 expected to generate a gross annual investment return of 9.60 percent for the total portfolio and returns for individual asset classes are compared to industry benchmarks for each respective asset class.

¹Assets under management include categories classified as cash and cash equivalents for financial statement purposes.

²The contract with Legg Mason was terminated in June 2010.

³The contract with WCM was terminated in June 2010.

⁴The contract with Batterymarch was terminated in October 2009.

⁵The contract with ClariVest was terminated in June 2010.

⁶Manager hired during fiscal year 2010.

⁷Morgan Stanley assets were transitioned into the hedge fund subaccount of the SCRS/Morgan Stanley Partnership during fiscal year 2010.

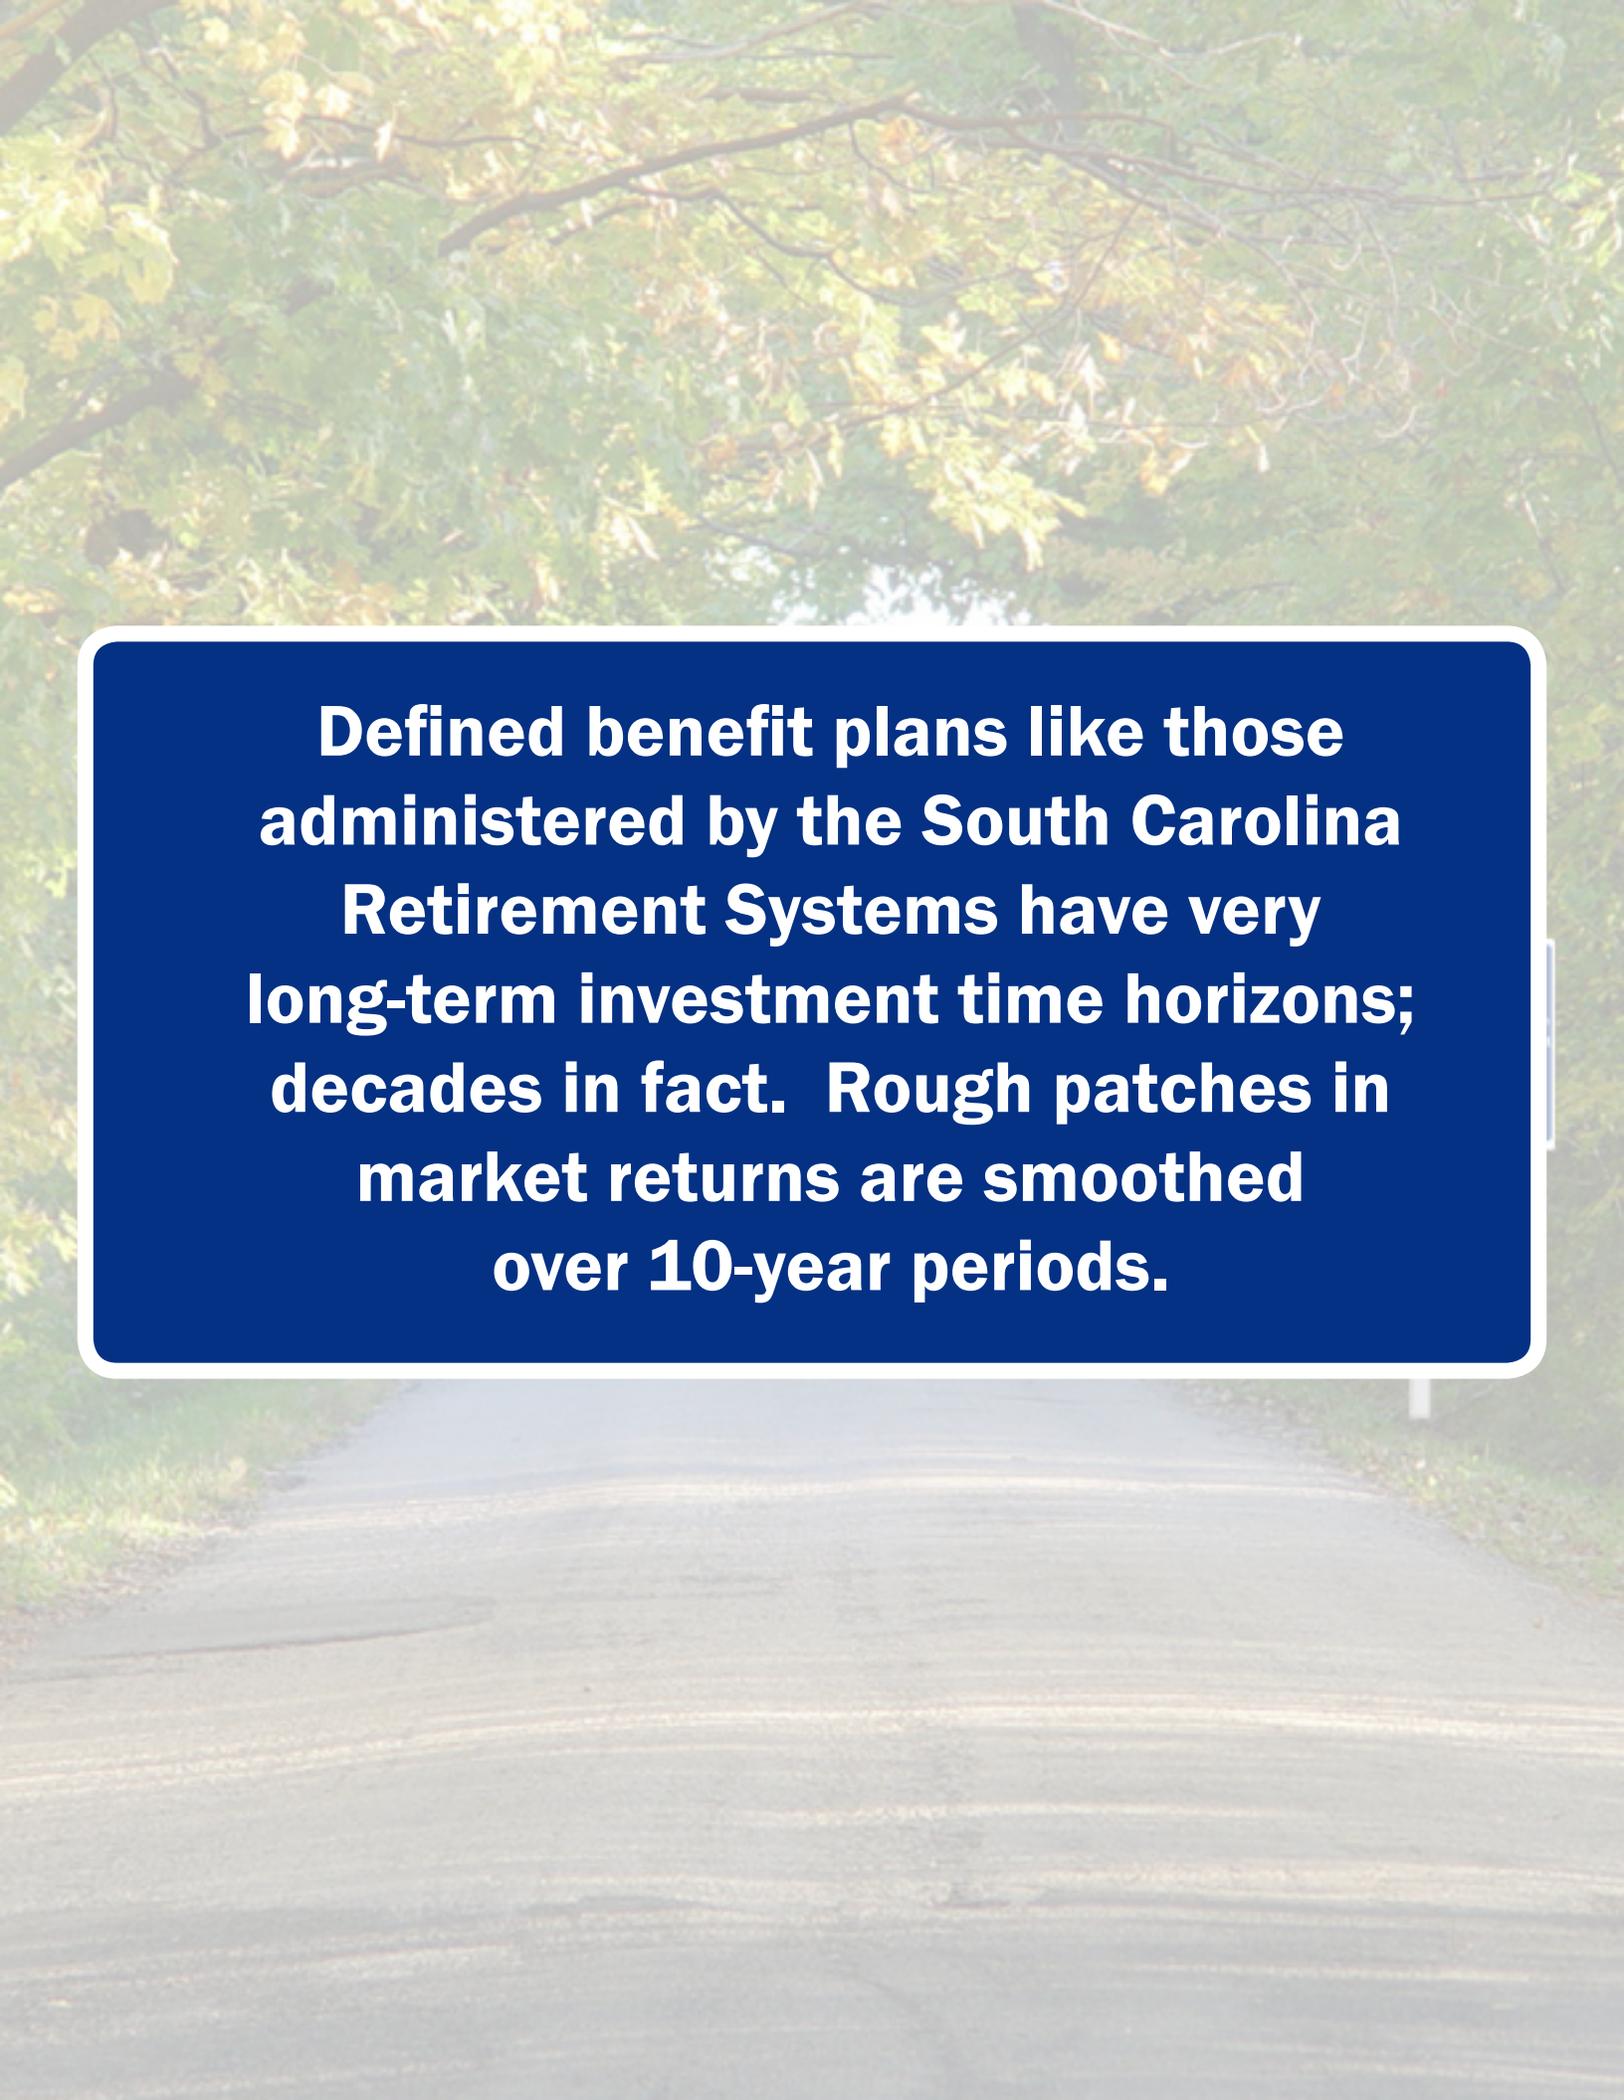

⁸FrontPoint assets were transitioned into the hedge fund subaccount of the SCRS/Morgan Stanley Partnership during fiscal year 2010.

⁹Balances in the Residual Assets account are held temporarily while waiting to be placed in a more permanent investment.

Several of the alternative investment managers provide account valuations on a net of fee basis. Management fees are netted against investment income and because they are not readily separable for specific investment income, amounts are recorded and reported net of fees.

Columbia, South Carolina 29211

Re: Certification and Statement Regarding the Actuarial Valuations as of July 1, 2009

Dear Members of the Board:

Applicable Laws

The law governing the operation of the Retirement Systems provides that actuarial valuation of the assets and liabilities shall be made annually for the South Carolina Retirement System and the Police Officers Retirement System and at least every other year for the General Assembly Retirement System, the Judges and Solicitors Retirement System and the National Guard Retirement System. We have performed the annual actuarial valuations of each of the five separate Retirement Systems as of July 1, 2009.

Funding Objective

A funding objective is that the contribution requirements of each System will remain relatively level over time. Where contribution rates are set by the Board, the valuation is used to determine the sufficiency of the contributions to maintain or improve the measures of the Systems' funding progress (i.e. *funded ratio*, *funding period*) and provide for the complete funding of all actuarial liabilities within 30 years or less if statutorily required.

Funding Methodology

The entry age normal actuarial cost method determines each System's normal cost, the cost of the current year's benefit accrual. Additionally, the method determines the actuarial liability, the value of benefits already earned by active and retired members due to past service. A smoothing technique is utilized to produce a market-related actuarial value of assets with the goal of dampening the impact of investment return volatility. The *funded ratio* is the actuarial value of assets as a percentage of the actuarial liability.

An unfunded actuarial liability exists to the extent a System's actuarial liability exceeds its actuarial value of assets. The contribution amount in excess of the System's normal cost is the amount available to amortize an unfunded actuarial liability utilizing the System's amortization method. The System's *funding period* is the resulting number of years necessary to fully amortize the unfunded actuarial liability with the available contributions.

Assumptions

Actuarial assumptions are necessary to estimate the future economic and demographic experience of the Systems. Experience studies are performed periodically to review the assumptions and are the basis for recommended changes. The actuarial assumptions used in the valuations are internally consistent and reasonably based on the actual experience of each of the Systems.

State Budget and Control Board
South Carolina Retirement Systems
September 24, 2010
Page 2

The current actuarial assumptions are in accordance with the applicable Actuarial Standards of Practice, as well as the parameters set forth in the Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*.

The results and conclusions of the reports are based on the actuarial valuations as of July 1, 2009. Differences between our projections and actual amounts depend on the extent to which future experience conforms to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience. These deviations will result in actuarial gains and losses to the respective System.

Data Reliance

In preparing the valuations, we, as the actuary, relied on data provided by the Systems. As part of our work, we performed a limited review of the data for consistency and reasonableness and did not find material defects in the census data.

Supporting Schedules

Our firm, as actuary, is responsible for the actuarial trend data in the financial section of the report and the supporting schedules in the actuarial section, beginning with the information for the July 1, 2009 (July 1, 2004 for the National Guard Retirement System). Information for previous years was supplied by other actuarial firms employed by the System at that time.

Certification

Based on the results of the July 1, 2009 valuations, we believe that the valuations appropriately reflect each of the System's long term obligations and the current and scheduled contribution levels are sufficient to fund the liabilities of each System over a reasonable time frame, and based on these criteria may be deemed actuarially sound.

I, John Garrett, Principal, and I, Edward A. Macdonald, President, are qualified actuaries with Cavanaugh Macdonald Consulting, LLC. We are both Members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein. On the basis of the foregoing, we certify that, to the best of our knowledge the valuation reports are complete and accurate and have been prepared in accordance with South Carolina's statutes and generally recognized and accepted actuarial principles and practices which are consistent with the principles prescribed by the Actuarial Standards Board (ASB) and the Code of Professional Conduct and Qualification Standards for Public Statements of Actuarial Opinion of the American Academy of Actuaries.

Respectfully submitted,

South Carolina Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Return to be Earned by Fund

8.00 percent per annum, compounded annually, composed of an assumed 3.00 percent inflation rate and a 5.00 percent real rate of return, net of investment and administrative expenses.

2. Salary Increases

Rates of annual salary increases are assumed to vary for the first 14 years of service due to expected merit and promotional increases which differs by employee group. Beginning with the 15th year of service, the assumed annual rate of increase is 4.00 percent for both groups and for all future years of service. The 4.00 percent rate of increase is composed of a 3.00 percent inflation component and a 1.00 percent real rate of wage increase (productivity) component.

Annual Increase			Annual Increase		
Years of Service	General Employees	Teachers	Years of Service	General Employees	Teachers
0	8.00%	8.00%	8	4.50%	4.75%

Actuarial Section

4. Mortality After Retirement

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates is used, with the female rates set back one year. A separate table of mortality rates is used for disabled retirees based upon the RP-2000 Disabled Retiree Mortality Table. The following are sample rates:

Age	Healthy				Disabled			
	Employees		Teachers		Employees		Teachers	
	Male	Female	Male	Female	Male	Female	Male	Female
50	0.28%	0.14%	0.25%	0.14%	2.46%	1.27%	2.17%	1.27%
55	0.48%	0.22%	0.43%	0.22%	3.01%	1.82%	2.66%	1.82%
60	0.86%	0.42%	0.76%	0.42%	3.57%	2.40%	3.15%	2.40%
65	1.56%	0.82%	1.39%	0.82%	4.26%	3.08%	3.76%	3.08%
70	2.55%	1.37%	2.34%	1.37%	5.32%	4.14%	4.69%	4.14%
75	4.00%	2.19%	3.66%	2.19%	6.98%	5.75%	6.16%	5.75%
80	6.67%	3.80%	6.01%	3.80%	9.30%	7.95%	8.20%	7.95%
85	10.46%	6.56%	9.64%	6.56%	12.04%	11.02%	10.62%	11.02%

5. Marriage Assumption

One hundred percent of all active members are assumed to be married, with female spouses being three years younger.

6. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return (including the return on TERI balances) and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

7. Actuarial Cost Method

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to post 7/1/2005 TERI participants, ORP

Actuarial Section

participants and return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active SCRS employees. It is assumed that amortization payments are made monthly at the end of the month.

8. Unused Annual Leave

To account for the effect of unused annual leave on Average Final Compensation, liabilities for active members are increased 2.14 percent.

9. Unused Sick Leave

To account for the effect of unused sick leave on members' final credited service, the service of active members who retire is increased three months.

10. Future Cost-of-Living Increases

Benefits are assumed to increase 2 percent annually beginning on the next July 1st following receipt of 12 monthly payments.

11. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

12. Payroll Growth Rate

The total annual payroll of active members (also applies to TERI, ORP and rehired retiree participants) is assumed to increase at an annual rate of 4.00 percent. This rate represents the underlying expected annual rate of wage inflation and does not anticipate increases in the number of members.

13. Changes from Prior Valuation

None.

Police Officers Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Return to be Earned by Fund

8.00 percent per annum, compounded annually, composed of an assumed 3.00 percent inflation rate and a 5.00 percent real rate of return, net of investment and administrative expenses.

2. Salary Increases

Rates of annual salary increase are assumed to vary for the first 11 years of service due to expected merit and promotional increases. Beginning with the 12th year of service, the assumed annual rate of increase is 4.50 percent for both groups and for all future years of service.

The 4.50 percent rate of increase is composed of a 3.00 percent inflation component and a 1.50 percent real rate of wage increase (productivity) component.

<u>Years of Service</u>	<u>Annual Increase</u>	<u>Years of Service</u>	<u>Annual Increase</u>
0	11.50%	7	4.75%
1	6.75%	8	4.75%
2	5.75%	9	4.75%
3	5.50%	10	4.75%
4	5.25%	11	4.75%
5	5.00%	12+	4.50%
6	4.75%		

3. Decrement Rates

The following are representative values of the assumed annual rates of withdrawal, inservice mortality, disability, and service retirement.

- Table below provides a summary of the assumed rates of service retirement, mortality while actively employed, and disability.

<u>Age</u>	<u>Annual Rate of</u>		
	<u>Service Retirement¹</u>	<u>Mortality</u>	<u>Disability</u>
20		0.03%	0.12%
25		0.03%	0.14%
30		0.04%	0.18%
35		0.07%	0.35%
40		0.10%	0.46%
45	20.00%	0.14%	0.69%
50	20.00%	0.19%	0.86%
55	14.00%	0.27%	
60	15.00%	0.44%	
64	25.00%	0.63%	

¹Plus an additional 22 percent for participants under age 55 in year when first eligible for unreduced service retirement.

All employees are assumed to retire at age 65. In addition, 25 percent of disabilities are assumed to be duty-related, and 5 percent of pre-retirement deaths are assumed to be accidental (duty-related).

Note: No probability of withdrawal is applied to members eligible to retire.

4. **Mortality After Retirement**

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates is used, with female rates set back one year and male rates set forward three years. A separate table of mortality rates is used for disabled retirees. The following are sample rates for the retirees and beneficiaries:

Age	Healthy		Disabled
	Male	Female	All
50	0.39%	0.14%	2.30%
55	0.68%	0.22%	2.89%
60	1.23%	0.42%	3.62%
65	2.14%	0.82%	4.07%
70	3.35%	1.37%	4.43%
75	5.40%	2.19%	5.05%
80	8.87%	3.80%	6.77%
85	13.65%	6.56%	10.09%

5. **Marriage Assumption**

One hundred percent of all active members are assumed to be married, with female spouses being four years younger.

6. **Asset Valuation Method**

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

7. **Actuarial Cost Method**

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active

Actuarial Section

member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active employees. It is assumed that amortization payments are made monthly at the end of the month.

8. Unused Annual Leave

To account for the effect of unused annual leave on Average Final Compensation, liabilities for active members are increased 3.75 percent.

9. Unused Sick Leave

To account for the effect of unused sick leave on members' final credited service, the service of active members who retire is increased three months.

10. Future Cost-of-Living Increases

Benefits are assumed to increase 2 percent annually beginning on the next July 1st following receipt of 12 monthly payments.

11. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

12. Payroll Growth Rate

The total annual payroll of active members (also applies to rehired retiree participants) is assumed to increase at an annual rate of 4.00 percent. This rate does not anticipate increases in the number of members.

13. Changes from Prior Valuation

None.

General Assembly Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Return to be Earned by Fund

8.00 percent per annum, compounded annually, composed of an assumed 3.00 percent inflation rate and a 5.00 percent real rate of return, net of investment and administrative expenses.

2. Salary Increases

None assumed.

3. Decrement Rates

The following are representative values of the assumed annual rates of in-service mortality, disability, and service retirement. No withdrawals are assumed. All members who are not re-elected are assumed to continue paying the member rate as a special contributor.

a. Unreduced Service Retirement

<u>Age</u>	<u>Rates of Retirement</u>
60 & under	40%
61	7%
62	7%
63	7%
64	7%
65	15%
66	15%
67	15%
68	15%
69	15%
70 & older	100%

In addition, members with 30 years of service are assumed to commence benefit payments immediately. Special contributors are assumed to retire at age 60.

b. In-service Mortality and Disability

<u>Age</u>	<u>Annual Rates of</u>			
	<u>Mortality</u>		<u>Disability</u>

60	0.49%	0.26%	1.15%	1.12%
64	0.70%	0.35%	1.44%	1.56%

Actuarial Section

4. Mortality After Retirement

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates, with the female rates set back one year. A separate table of mortality rates is used for disabled retirees. The following are sample rates:

Age	Healthy		Disabled	
	Male	Female	Male	Female
50	0.28%	0.14%	3.06%	2.31%
55	0.48%	0.22%	3.86%	2.66%
60	0.86%	0.42%	4.82%	2.98%
65	1.56%	0.82%	5.42%	3.33%
70	2.55%	1.37%	5.91%	3.70%
75	4.00%	2.19%	6.74%	4.43%
80	6.67%	3.80%	9.02%	6.71%
85	10.46%	6.56%	13.45%	10.15%

5. Marriage Assumption

One hundred percent of all active and special contributor members are assumed to be married, with female spouses being four years younger.

6. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

7. Actuarial Cost Method

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability by June 30, 2027.

8. Future Cost-of-Living Increases

None assumed.

Actuarial Section

9. Payroll Growth Rate

None assumed.

10. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

11. Changes from Prior Valuation

Actuarial Section

5. Normal Retirement Assumption

Rates differ based upon the member being eligible to Retire in Place (RIP) prior to reaching age 72. Upon meeting the retirement eligibility requirement, participants are assumed to retire at the following rates:

Normal Retirement Assumption							
Solicitors and Public Defenders				Judges			
Age	Service	% RIP Eligible	% Not RIP Eligible	Age	Service	% Retiring	% Not RIP Eligible
70 to 72	15 to 19	12	12	70 to 72	15 to 19	12	12
65 to 69	20 to 23	40	40	65 to 69	20 to 24	40	40
Any	24	20	40	Any	25	15	25
Any	25	15	25	Any	26	10	15
Any	26	10	12	Any	27	10	15
Any	27	10	12	Any	28	10	15
Any	28	10	12	Any	29	10	15
Any	29	5	12	Any	30	5	15
Any	30	5	12	Any	31	5	15
Any	31 ¹	12 ¹	35	Any	32 ¹	12 ¹	35
Any	32+	12	12	Any	33+	12	15

¹Additionally, the remaining 88 percent of eligible members are assumed to Retire in Place. 100 percent of participants are assumed to retire upon reaching the mandatory retirement age of 72.

6. Marriage Assumption

Ninety-five percent of all active members are assumed to be married with female spouses being four years younger.

7. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

8. Actuarial Cost Methods

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

Actuarial Section

The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active employees. It is assumed that amortization payments are made monthly at the end of the month.

9. Future Cost-of-Living Increases

Benefits are assumed to increase 3.25 percent annually.

10. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

11. Payroll Growth Rate

The total annual payroll of active members (also applies to rehired retiree participants) is assumed to increase at an annual rate of 3.25 percent. This rate does not anticipate increases in the number of members.

12. Changes from Prior Valuation

None.

55	.100	1.000	.0061	.0101
60		1.000	.0092	.0163

¹Applied only to members with less than 20 years of service.

No rates of withdrawals are assumed.

3. Mortality After Retirement

The 1983 Group Annuity Mortality Table rates for males is used.

4. Marriage Assumption

Not applicable because no death benefits are payable.

5. Asset Valuation Method

The actuarial value is a smoothed asset value that recognizes 10 percent (20 percent for returns prior to July 1, 2007) of the difference between the expected investment return and actuarial investment return each year for 10 years (5 years for returns prior to July 1, 2007). The expected investment return equals the prior year's market value of assets adjusted with contributions, and payments using the investment earnings assumption from the prior year's valuation (7.25 percent for returns in the year beginning on July 1, 2007 and 8.00 percent beginning July 1, 2008).

6. Cost Methods

Projected benefit method with entry age normal cost and open-end accrued liability. Gains and losses are reflected in the unfunded accrued liability.

Actuarial Section

7. Changes from Prior Valuation

There have been no changes since the prior valuation.

8. Adoption Date

Cavanaugh Macdonald Consulting, LLC, is the consulting actuary responsible for the actuarial trend data in the financial section of the report and the supporting schedules in the actuarial section. The exact adoption date for the current actuarial assumptions and methods is unknown. The discount rate and retirement rates were last changed for the 1996 valuation. The death, disability, and mortality rates were changed in 1990 by the prior actuary.

Note: Effective for the 7-1-2000 valuation, eligibility for an unreduced retirement annuity under SCRS was reduced from 30 years of service to 28 years. The SCRS also adopted a deferred retirement option plan.

Effective 7-1-2003, actuarial assumptions were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, disability incidence assumptions and withdrawal rate assumptions were revised for both SCRS and PORS. In addition, the assumed mortality rates for retired SCRS members were revised, along with the assumed mortality rates of active and disabled members for PORS.

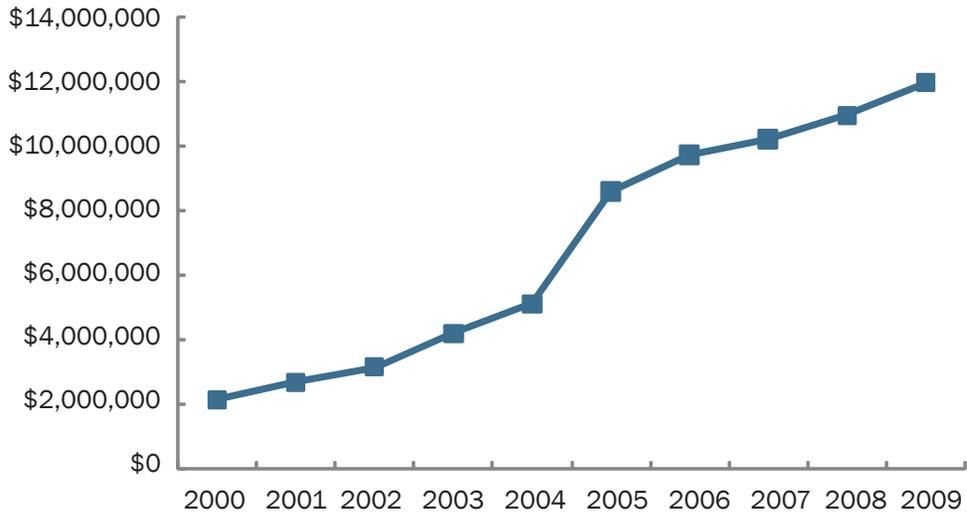

Effective 7-1-2005, actuarial assumptions were changed to include an increase in member contributions to 6.25 percent of earnings for fiscal year 2006 and 6.50 percent beginning fiscal year 2007; all return-to-work retirees and those TERI participants who joined the system after 7-01-2005 contributing at the same rate as active employees; a reduction in the interest rate credited to accumulated employee contributions from 6 percent to 4 percent; and the addition of a guaranteed COLA equal to the change in CPI, but not to exceed 1 percent, for SCRS retirees beginning the July 1st following a full year of annuity payments.

Effective 7-1-2008, actuarial assumptions for SCRS were changed as a result of a 5 year experience study. Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

7-01-00	87,536	144,631	60.5%	57,095	13,214	432.1%	

Note: The 7-1-2002, GARS valuation reflected the change in legislation effective January 1, 2003, which allows a member who has attained the age of 70 or has 30 years of service to retire and draw an annuity while continuing to serve in the General Assembly.

Effective 7-1-2003, actuarial assumptions for GARS and JSRS were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, and disability incidence assumptions were revised.

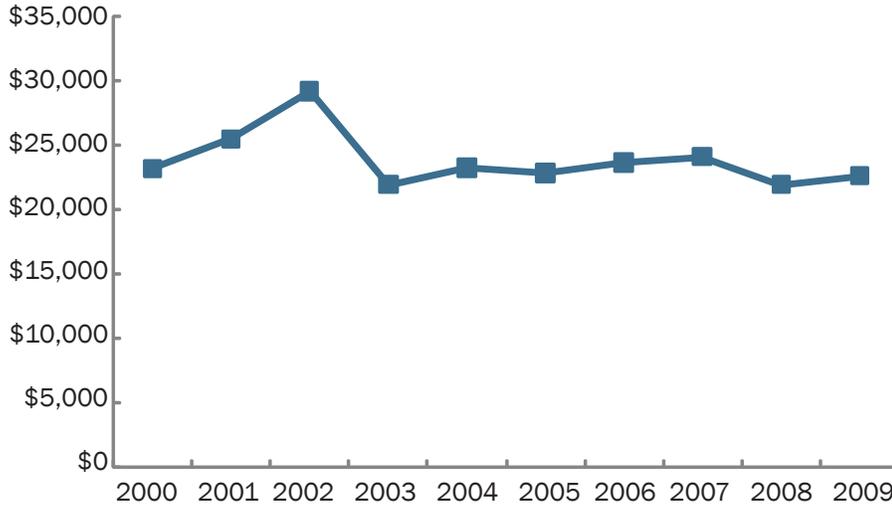

Effective 7-1-2005, actuarial assumptions were changed to include updated normal retirement rates based on analysis of historical normal retirement experience.

Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

Note: Effective for the 7-1-2000 valuation, eligibility for an unreduced retirement annuity under SCRS was reduced from 30 years of service to 28 years. The SCRS also adopted a deferred retirement option plan.

Effective 7-1-2003, actuarial assumptions were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, disability incidence assumptions and withdrawal rate assumptions were revised for both SCRS and PORS. In addition, the assumed mortality rates for retired SCRS members were revised, along with the assumed mortality rates of active and disabled members for PORS.

Effective 7-1-2005, actuarial assumptions were changed to include an increase in member contributions to 6.25 percent of earnings for fiscal year 2006 and 6.50 percent beginning fiscal year 2007; all return-to-work retirees and those TERI participants who joined the system after 7-01-2005 contributing at the same rate as active employees; a reduction in the interest rate credited to accumulated employee contributions from 6 percent to 4 percent; and the addition of a guaranteed COLA equal to the change in CPI, but not to exceed 1 percent, for SCRS retirees beginning the July 1st following a full year of annuity payments.

Effective 7-1-2008, actuarial assumptions for SCRS were changed as a result of a 5 year experience study. Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

Summary of Basic Provisions

SCRS	PORS	GARS	JSRS	NGRS
1. Membership				
All permanent, full-time and part-time employees of covered employers must join unless specifically exempted by statute or are eligible and elect to participate in the State ORP.	To be eligible for PORS membership, an employee must be required by the terms of his employment, by election or appointment, to preserve public order, protect life and property, and detect crimes in the state; to prevent and control property destruction by fire; be a coroner or deputy coroner in a full-time permanent position; or be a peace officer employed by the SC Department of Corrections, the SC Department of Juvenile Justice, or the SC Department of Mental Health. Probate judges and coroners may elect membership in PORS. Magistrates are required to participate in PORS for service as a magistrate. PORS members, other than magistrates and probate judges, must also earn at least \$2,000 per year and devote at least 1,600 hours per year to this work, unless exempted by statute.	Generally, all persons are required to participate upon taking office as member of the General Assembly unless exempted by statute.	All solicitors, circuit public defenders, judges of a Circuit or Family Court, and justices of the Court of Appeals and Supreme Court are required to participate upon taking office unless exempted by statute.	Individuals serving in the South Carolina National Guard.
2. Employee Contributions				
Class I 5% of earnable compensation	Class I \$21 per month	10% of earnable compensation	10% of earnable compensation	Not applicable as this is a non-contributory plan
Class II 6.5% of earnable compensation	Class II 6.5% of earnable compensation			
3. Employer Contributions				
Class I 4.25% of earnable compensation	Class I 7.8% of earnable compensation	Annual lump-sum appropriation	44.64% of earnable compensation	Annual lump-sum appropriation
Class II 9.24% of earnable compensation	Class II 10.65% of earnable compensation			
Death Benefit Program 0.15% of earnable compensation	Death Benefit Program 0.2% of earnable compensation	Death Benefit Program Included within annual lump-sum appropriation	Death Benefit Program 0.45% of earnable compensation	Death Benefit Program Not applicable

8. Formula for Normal Service Retirement (continued)

Class II

1.82% of Average Final Compensation times years of credited service

Class II

2.14% of Average Final Compensation times years of credited service

2.67% for each year of active service over 25 years for judges or over 24 years for solicitors or circuit public defenders. The monthly retirement allowance may not exceed 90% of the current active salary for the member's position. Upon retirement, a member will receive an additional benefit equal to employee contributions and accumulated interest remitted after reaching the maximum 90% benefit.

up to 30 years of service, the retiree receives an additional \$5. The maximum monthly benefit a retiree can receive is \$100.

9. Requirements for Disability Retirement

5 years of earned service unless injury is job related. Must be disabled based on job specific standard.

5 years of earned service unless injury is job related. Must be disabled based on job specific standard.

5 years of credited service. Must be disabled based on job specific standard.

5 years of credited service. Must be disabled based on job specific standard.

Not applicable

10. Formula for Disability Retirement

The disability retirement benefit based on a projection of service credit to age 65 with an actuarial reduction. Minimum benefit of 15% of AFC at any age.

The disability retirement benefit is based on a projection of service credit to age 55. Minimum benefit of 15% of AFC at any age.

The disability retirement benefit is based on the greater of the following options:

- a. Service benefit based upon actual credited service or
- b. 50% of service benefit based on projection of service to earlier of age 60 or 35 years service.

The disability retirement benefit is based on the service retirement formula.

Not applicable

11. Benefit Options

Option A (Maximum/Retiree Only)

Formula benefit as calculated in item 8. Non-recovered contributions paid upon death.

Option A (Maximum/Retiree Only)

Formula benefit as calculated in item 8. Non-recovered contributions paid upon death.

Maximum Benefit (Retiree Only)

Formula benefit as calculated in item 8. Non-recovered contributions paid upon death.

Maximum Benefit (Retiree/One-Third Spouse)

Formula as calculated in item 8. Continued annuity of one-third of member's benefit to a spouse beneficiary upon death of retiree or return of contributions to a designated non-spouse beneficiary.

Formula benefit as calculated in item 8.

Option B (100% - 100% Joint Retiree/Survivor)

Provides a reduced (from Option A) lifetime benefit that upon retiree's death continues to retiree's beneficiary. This option is subject to non-spousal beneficiary limitations based on state statute and an Internal Revenue Code formula.

Option B (100% - 100% Joint Retiree/Survivor)

Provides a reduced (from Option A) lifetime benefit that upon retiree's death continues to retiree's beneficiary. This option is subject to non-spousal beneficiary limitations based on state statute and an Internal Revenue Code formula.

Option 1

Provides a reduced (from the Maximum Benefit) lifetime benefit that upon retiree's death continues to retiree's beneficiary. Benefit will not revert to Maximum if all of the retiree's beneficiaries predecease the retiree.

Optional Allowance

Provides a reduced (from the Maximum Benefit) lifetime annuity that upon the retiree's death will continue at one-third of the retiree's annuity to a non-spouse beneficiary (or in equal shares to multiple beneficiaries).

Option C (100% - 50% Joint Retiree/Survivor)

Provides a reduced (from Option A) lifetime benefit that upon retiree's death will continue to retiree's beneficiary at 50% of the retiree's annuity.

Option C (100% - 50% Joint Retiree/Survivor)

Provides a reduced (from Option A) lifetime benefit that upon retiree's death will continue to retiree's beneficiary at 50% of the retiree's annuity.

Option 2

Provides a reduced (from the Maximum Benefit) lifetime benefit that upon retiree's death will continue to retiree's beneficiary at 50% of the retiree's annuity. Benefit will not revert to Maximum if all of the retiree's beneficiaries predecease the retiree.

11. Benefit Options (continued)

Note: If a retiree selects Option B or Option C and all of the retiree's beneficiaries predecease the retiree, the retiree's benefit will revert to Option A.

Note: If a retiree selects Option B or Option C and all of the retiree's beneficiaries predecease the retiree, the retiree's benefit will revert to Option A.

Revert to Maximum (1A or 2A)
This feature will allow benefits to be changed to the Maximum Benefit if the retiree selects Option 1 or Option 2 and all of the retiree's beneficiaries predecease the retiree.

12. Deferred Retirement Option Programs

Upon meeting retirement eligibility, a member can elect to retire and continue working under the Teacher and Employee Retention Incentive (TERI) program for a maximum of five years, after which employment will cease. During TERI participation, the retirement annuity will not be paid to TERI retirees, but monthly benefits will be accumulated in TERI accounts and will be distributed to the members upon termination of employment. For members retiring after June 30, 2005, a payment for unused annual leave is not included in calculating TERI benefits. Upon termination, however, benefits will be increased prospectively to include payment for up to 45 days annual leave paid at termination of employment. No interest is credited to the TERI account. TERI participants who entered the program after June 30, 2005, must continue to contribute at the same rate as active members. Those who entered TERI prior to July 1, 2005, make no employee contributions while participating in the TERI program. No additional service credit is earned during this period and participants are ineligible for disability retirement benefits.

Not applicable

Not applicable

A JSRS member who has not reached age 60, but is eligible to retire and receive the 90 percent maximum JSRS annuity may retire and continue to serve as a judge, solicitor, or circuit public defender. However, the monthly annuity will be deferred, without interest, until the member reaches age 60. Payout of the deferred annuity will be made when the retired JSRS member reaches the normal retirement age of 60.

Not applicable

Employee and employer contributions must continue to be paid while a member is participating in the JSRS deferred retirement program, but no additional service is earned.

13. Return to Work Provisions

A retired member of the system who has been retired for at least 15 consecutive calendar days may be hired and return to covered employment without affecting his monthly retirement benefit. The employer and working retiree must remit employer and employee contributions at the same rate as if the member were an active contributing member. Working retirees are not eligible for subsequent disability retirement, will not earn additional service credit, and will have no additional interest credited to their account.

A retired member of the system who has been retired for at least 15 consecutive calendar days may be hired and return to covered employment without affecting his monthly retirement benefit. The employer and working retiree must remit employer and employee contributions at the same rate as if the member were an active contributing member. Working retirees are not eligible for subsequent disability retirement, will not earn additional service credit, and will have no additional interest credited to their account.

An active GARS member who has reached age 70 or has 30 years of service credit may retire and begin receiving a GARS retirement annuity while continuing to serve in office. The retired GARS member will receive a retirement annuity in lieu of a per diem salary and additional line item pay for certain positions. Generally, a retired member of GARS may return to work after retirement with no limit on the dollar amount that may be earned as compensation; however, certain conditions and restrictions may apply to employers covered by SCRS, PORS, GARS and JSRS.

A member who is age 60 and eligible to receive the maximum monthly benefit, may retire and receive a retirement benefit while continuing to serve as a judge, solicitor, or circuit public defender until the end of the calendar year in which the member reaches age 72. Employee and employer contributions must continue to be paid as if the retiree was an active contributing member, but no additional service credit accrues and no additional interest is credited to their retirement account. Additionally, a retired judge may continue to receive a retirement benefit while employed by a public institution of education, provided the judge does not contribute to or receive service credit in SCRS.

Not applicable

14. Post Retirement Increase

Each July 1, eligible retired members should receive an automatic COLA up to an increase of 2 percent if the Consumer Price Index for Wage Earners and Clerical Workers (CPI) as of the previous December 31 is at least 2 percent. If the CPI is less than 2 percent, the COLA should equal the actual increase in the CPI. COLAs are earned only during periods of inflation.

Each July 1, eligible retired members should receive an automatic COLA up to an increase of 2 percent if the Consumer Price Index for Wage Earners and Clerical Workers (CPI) as of the previous December 31 is at least 2 percent. If the CPI is less than 2 percent, the COLA should equal the actual increase in the CPI. COLAs are earned only during periods of inflation.

Retired member receives benefit based on current salary for member's position.

Retired member receives benefit based on current salary for member's position.

Cost-of-living increases are not provided.

15. Accidental Death Program

Not applicable

Provides 50% of earnable compensation at time of accidental death in the line of duty as an annuity to either the surviving spouse, children, or parents. The annuity to surviving children ends upon each child's 18th birthday.

16. Death Benefit Program

Lump-sum payment equal to one year's salary payable to the beneficiary upon the death of an active or working retired contributing member with at least one year of service.

No service requirement for death resulting from an injury arising out of the actual performance of duties for an active member.

Lump-sum payment to retiree's beneficiary of up to \$6,000 based upon years of service at retirement. TERI participants and working retired contributing members are eligible for an increased death benefit payment equal to their annual salary in lieu of the standard retired member benefit.

Lump-sum payment equal to one year's salary payable to the beneficiary upon the death of an active member with at least one year of service. No service requirements for death resulting from an injury arising out of the actual performance of duties for an active member.

Lump-sum payment to retiree's beneficiary of up to \$6,000 based upon year of service at retirement. Retired contributing members are eligible for an increased death benefit payment equal to their annual salary in lieu of the standard retired member benefit.

Lump-sum payment equal to one year's salary payable to the beneficiary upon the death of an active member with at least one year of service. No service requirement for death resulting from an injury arising out of the actual performance of duties for an active member.

Lump-sum payment to retiree's beneficiary of up to \$3,000 based upon years of service at retirement.

Lump-sum payment equal to one year's salary payable to the beneficiary upon the death of an active member with at least one year of service. No service requirement for death resulting from an injury arising out of the actual performance of duties for an active member.

Lump-sum payment to retiree's beneficiary of up to \$3,000 based upon years of service at retirement.

Not applicable

17. Withdrawal of Employee Contributions

Accumulated contributions, plus interest, payable upon request 90 days after termination of all covered employment.

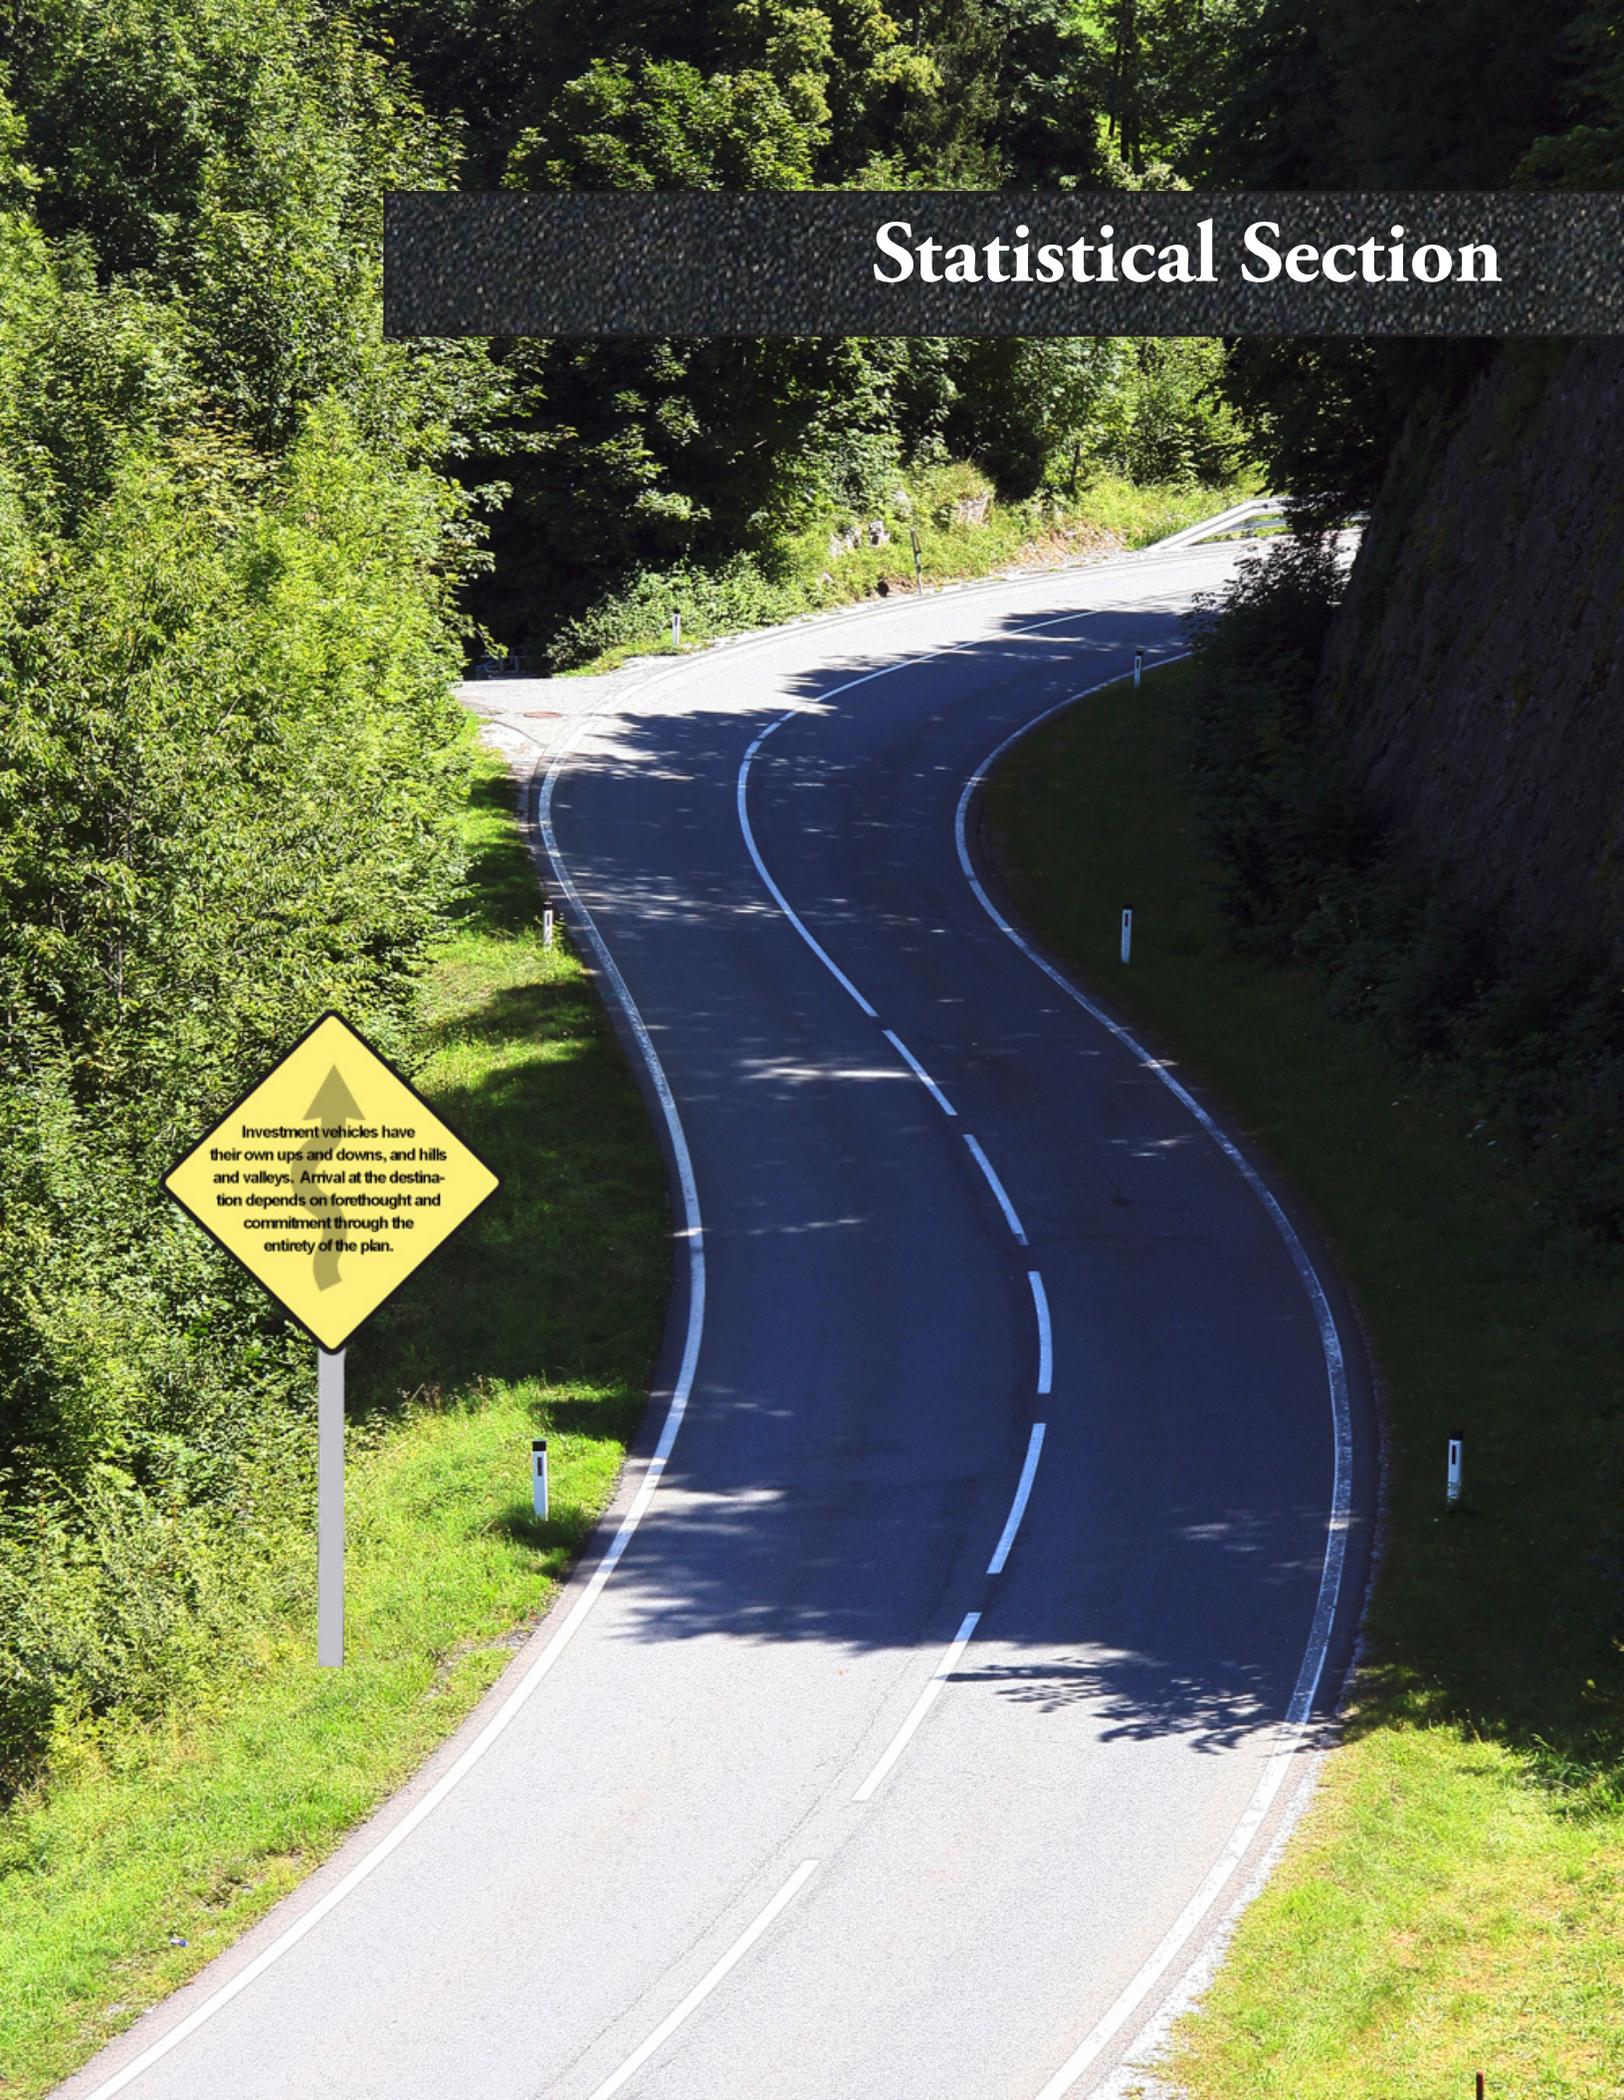

Accumulated contributions, plus interest, payable upon request 90 days after termination of all covered employment.

Accumulated contributions, plus interest, paid as promptly as feasible upon request after termination of all covered employment.

Accumulated contributions, plus interest, paid as promptly as feasible upon request after termination of all covered employment.

Not applicable as this is a non-contributory plan

Statistical Section Summary

The objective of the Statistical Section is to provide financial statement users with additional historical perspective, context, and detail to assist in using information presented in the Financial Statements, Notes to Financial Statements, and Required Supplementary Information to understand and assess the Systems' economic condition. Information reported in the Systems' statistical section is presented in four main categories: Financial Trends Information, Operating Information, Revenue Capacity Information, and Demographic and Economic Information.

Financial Trends Information

Page No.

Ten Year Summary of Plan Net Assets - All Systems Combined	156
Ten Year Schedule of Changes in Net Assets - SCRS, PORS, GARS, JSRS, NGRS	157-161
Pension Trust Funds Additions by Source - Last Ten Fiscal Years	162
Pension Trust Funds Deductions by Type - Last Ten Fiscal Years	163
Pension Trust Funds Additions and Deductions - Last Ten Fiscal Years	164-166
Pension Trust Funds Benefit Expenses by Type - Last Ten Fiscal Years	167

Operating Information

Retired Members by Type of Benefit - SCRS, PORS, GARS, JSRS, NGRS	169-171
Retired Members by Years of Service - SCRS, PORS, GARS, JSRS, NGRS	172-176

Financial Trends Information

Financial Trends Information is intended to assist users in understanding and assessing how the Systems' financial position has changed over time. The ten year summary of plan net assets and ten year schedules of changes in plan net assets as well as the additions by source, deductions by type, and benefit expenses by type for the last ten fiscal years may be considered useful in determining financial trends.

The value of plan net assets in prior years reflected steady increases; however, negative investment returns realized during fiscal year 2008 and 2009 caused a significant decline in asset values for the portfolio. Positive investment returns during fiscal year 2010 resulted in an increase in the value of plan net assets of 2.2 billion.

While employee and employer contributions have increased though the years due to increases in contribution rates and growth in covered payroll, investment income is much more volatile due to its dependence on the market. During fiscal year 2010, employee and employer contributions decreased due to a slight decline in the number of active members. Contributions to the plans were also impacted by a number of retirement incentives offered by employers as a result of the depressed economy which also compelled member terminations, early retirements, and reduced compensation.

A rise in the number of annuitant payees and cost of living adjustments granted to retirees resulted in a steady increase in benefit expenses over the years. Refund expenses spiked during fiscal year 2006 as a result of a negative ruling on litigation in which contributions were required to be refunded to retired participants in the Teacher and Employee Retention Incentive (TERI) program. In addition, slight growth in death benefit claims has occurred over the past couple of years because beneficiaries of working retirees are now eligible for an increased level of benefits.

Statistical Section

Operating Information

Operating Information is intended to provide contextual information about the Systems' operations and resources to assist readers in using financial statement information to comprehend and evaluate the Systems' fiscal state. Schedules containing operating information include retired members by type of benefit and retired members by years of service, and principal participating employers for the current fiscal year and 10 years prior.

Although retirement types include service, disability and beneficiary payees, members retiring at normal retirement based on age and service represent the majority of the systems' annuitant payees. Various payment options are available at retirement; however, the majority of members elect to receive benefits under the maximum benefit level.

Effective January 1, 2001, normal service retirement eligibility was reduced from 30 to 28 years for the South Carolina Retirement System. This resulted in an unusually large number of members being eligible for and electing retirement, and a corresponding reduction in the years of service trend was experienced.

The number of covered employees working for certain participating governmental entities declined due to a number of factors. Eligibility in the State ORP was broadened significantly on July 1, 2002 to a wider variety of the public workforce and resulted in additional participants choosing this option instead of the defined benefit plans. In addition, the continuing economic decline has led to a reduction in hiring and an increase in terminations and retirement incentives. Also, the implementation of TERI and more liberal return-to-work policies under SCRS and PORS has led to more retired members filling positions that were previously performed by active employees.

Note: Benefit amounts represent original monthly benefit at retirement for all retirees and, for comparison purposes, do not include cost-of-living adjustments (COLA's). Although a member's retirement eligibility and AFC may include service from other correlated Systems, the Years of Credited Service in this schedule represents only service credit used for calculating the monthly benefit under this respective System.

All Other	13,096		92.31%	11,852	1,244	9,832		37.16%	9,712	120
Total ²	30,161		100.00%	27,767	2,394	26,490		100.00%	26,186	304

In 2010, "All Other" consisted of:

Type	Number	Employees
Quasi-State/Higher Ed	25	570
City/County	298	12,411
Public Schools	44	115
Total	367	13,096

In 2001, "All Other" consisted of:

Type	Number	Employees
Quasi-State/Higher Ed	18	431
City/County	242	9,396
Public Schools	4	5
Total	264	9,832

¹The number of covered employees represents the total number of employees reported by the employer throughout the fiscal year which includes working retirees.

²2010 total reflects 377 governmental entities and 2001 total reflects 274 governmental entities.

Statistical Section

Revenue Capacity Information

Revenue Capacity Information is intended to assist users in realizing and reviewing the factors that affect the Systems' ability to generate revenues. Employee and employer contribution rates for the most recent ten fiscal years are presented to aid in this category.

Over the past several years, the South Carolina General Assembly took several actions that resulted in the funding of not only a 1 percent automatic annual COLA for SCRS retirees effective July 1, 2005, and an additional 1 percent automatic annual COLA for SCRS retirees and a 2 percent automatic annual COLA for PORS retirees effective July 1, 2008. The 2 percent automatic annual COLAs in both SCRS and PORS are limited to the annual increase in Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) and were funded using increased employee and employer contributions as well as extensive diversification of the trust fund's investment portfolio, which was intended to achieve superior investment returns (at an assumed 8 percent rate of return). The PORS automatic COLA was additionally funded through increasing the unfunded liability amortization period to 29.9 years from 16.3 years.

Statistical Section

Employee Contribution Rates¹ Most Recent 10 Fiscal Years

Fiscal Year Ended June 30,	SCRS	PORS	GARS	JSRS
2010	6.50%	6.50%	10.00%	10.00%
2009	6.50%	6.50%	10.00%	10.00%
2008	6.50%	6.50%	10.00%	10.00%
2007	6.50%	6.50%	10.00%	10.00%
2006	6.25%	6.50%	10.00%	9.00%
2005	6.00%	6.50%	10.00%	8.00%
2004	6.00%	6.50%	10.00%	7.00%
2003	6.00%	6.50%	10.00%	7.00%
2002	6.00%	6.50%	10.00%	7.00%
2001	6.00%	6.50%	10.00%	7.00%

¹The National Guard Retirement System is a non-contributory plan; therefore, employee contribution rates are not applicable.

Employer Contribution Rates¹ Most Recent 10 Fiscal Years

Fiscal Year Ended June 30,	SCRS Class II ²			PORS Class II ²			JSRS	
	State Dept & Public Schools	Local Government	Death Benefit	All Employers	Death Benefit	Accidental Death	All Employers	Death Benefit
2010	9.24%	9.24%	0.15%	10.65%	0.20%	0.20%	44.64%	0.45%
2009	9.24%	9.24%	0.15%	10.65%	0.20%	0.20%	44.64%	0.45%
2008	9.06%	9.06%	0.15%	10.30%	0.20%	0.20%	44.64%	0.45%

2005	7.55%	6.70%	0.15%	10.30%	0.20%	0.20%	41.65%	0.45%
2004	7.55%	6.70%	0.15%	10.30%	0.20%	0.20%	41.35%	0.75%
2003	7.55%	6.70%	0.15%	10.30%	0.20%	0.20%	40.91%	0.75%
2002	7.55%	6.70%	0.15%	10.30%	0.20%	0.20%	40.76%	0.75%
2001	7.55%	6.70%	0.15%	10.30%	0.20%	0.20%	40.76%	0.75%

¹Employer contributions for the General Assembly Retirement System (GARS) are paid as an annual lump-sum appropriation, in which death benefit contributions are included. Employer contributions for the National Guard Retirement System (NGRS) are paid through an annual State appropriation.

²For employers with retiree insurance coverage, an additional retiree health insurance surcharge is collected by the Retirement Systems and remitted to the Employee Insurance Program; however, these rates are not considered employer retirement contributions and therefore are not included in this schedule.

Statistical Section

Demographic and Economic Information

Demographic and Economic Information is intended to assist users in evaluating the socioeconomic environment within which the Systems operate and to provide information that facilitates comparisons of financial statement information over time and among pension plans. Active and retired member data for the past ten fiscal years can be found in the Actuarial Section on Pages 108 -109 and 115 - 116, respectively, as well as Pages 133 and 134, respectively.

A list of the number of employers currently participating in the SCRS and PORS systems is presented in this section. State agencies, institutions of higher education, and public school districts are covered by Statute. The list of participating employers includes a directory of employers covered by separate agreement.

A photograph of a long, straight asphalt road lined with large, mature trees. The ground is covered with fallen brown leaves, suggesting an autumn setting. The trees are thick and their branches create a canopy over the road. The lighting is soft, with shadows cast across the pavement.
