

SOUTH CAROLINA RETIREMENT SYSTEM

REPORT OF THE ACTUARY ON THE SECOND AND THIRD ANNUAL VALUATIONS

(Second Valuation prepared as of June 30, 1947)
(Third Valuation prepared as of June 30, 1948)

REPORT ON THE SECOND AND THIRD ANNUAL VALUATIONS OF THE
SOUTH CAROLINA RETIREMENT SYSTEM

The South Carolina Retirement System was established as of July 1, 1945. The system is supported by the joint contributions of members and employers. The contributions to be made by employers are to be set from time to time on the basis of periodic actuarial valuations.

This report presents the results of the actuarial valuation of the contingent assets and liabilities of the system as of June 30, 1948, and gives the percentage rates of contribution payable by employers as determined on the basis of the valuation. In the appendix to this report there is included an actuarial balance sheet showing the approximate assets and liabilities of the system as of June 30, 1947.

SUMMARY OF MAIN BENEFIT AND CONTRIBUTION PROVISIONS

A summary of the main benefit provisions of the system, as interpreted in preparing the actuarial valuation, and a summary of the sources of revenue from which benefits are paid is presented in the following digest.

BENEFITS

Service Retirement Benefit

Conditions for Allowance

A retirement allowance is payable upon the request of any employee who has attained age 60. An employee must retire at age 65, except that with the approval of his employer, an employee may remain in service to age 70. Thereafter he may remain in service to age 72, upon approval of both his employer and the Retirement Board.

X 3

A retirement allowance is payable upon the request of any teacher who has attained age 60, or who has taught for a period of 35 years. A teacher must retire at age 65, except that, until July 1, 1950, a teacher in good health may, if he so elects, remain in service to age 72, upon approval of his employer.

Amount of Allowance

On service retirement, a member receives a retirement allowance which consists of:

(a) An employee annuity which is the actuarial equivalent of the member's accumulated contributions at the time of his retirement; and

(b) An employer annuity equal to the employee annuity allowable at age 65, or at age of retirement, whichever is less, on the basis of contributions made prior to age 65*; and

(c) If the member has credit for service rendered prior to the date of establishment, an additional employer annuity allowable at age 65, or at age of retirement, whichever is less, equal to the employee annuity which would have been provided by twice the contributions which he would have made during such prior service had the system been in force and he contributed** thereunder during the period of such prior service.

Disability Retirement Benefit

Condition for Allowance

A disability retirement allowance is payable to any member in service who becomes permanently incapacitated for duty, mentally or physically, and who has had 10 or more years of creditable service***.

*Based on resolution adopted by Board on May 21, 1947.

**In determining the contributions which would have been made during prior service, the Retirement Board is authorized to use, in lieu of the actual compensation received by the member, the compensation rates which on the basis of the salary scale adopted by the Board would have resulted in the actual average compensation received by the member during the five years immediately preceding the establishment of the system.

***Creditable service consists of membership service plus prior service,

Amount of Allowance

Upon disability retirement, a member who has attained age 60 receives a service retirement allowance, otherwise a disability retirement allowance which consists of:

- (a) An employee annuity which is the actuarial equivalent of the member's accumulated contributions at the time of retirement; and
- (b) An employer annuity equal to 75% of the employer annuity that would have been payable upon service retirement at age 60 had the member continued in service to age 60 without further change in compensation.

Return of ContributionsTeachers and Employees

Upon the withdrawal of a member without a retirement benefit, he is paid such part of the principal amount of his accumulated contributions as he demands.

Upon the death of a member before retirement, the member's accumulated contributions are payable to his designated beneficiary or to his estate.

Should any member, upon ceasing to be a teacher or employee, except by death or retirement, leave an amount equal to at least one payroll deduction in his account, such member shall enjoy all the privileges of membership as enjoyed at the time of such leaving, including his claim to prior service credit, for a period of five years, provided that, upon re-entry into his former field, he pays into the fund an amount not less than the amount withdrawn.

Optional Allowance

Until the first payment on account of any benefit becomes normally due, any member may elect to receive his retirement allowance in accordance with one of the following forms, which are computed to be actuarially equivalent:

Option 1. A reduced retirement allowance payable during the beneficiary's lifetime with the provision that, in case of his death before he has received in payments of his annuity the present value of his employee annuity as it stood at the time of retirement, the balance is to be paid to his legal representative or to such other person as he shall have designated at the time of his retirement.

Option 2. A reduced retirement allowance payable during the beneficiary's lifetime with the provision that, after his death, the reduced retirement allowance is to be continued throughout the life of such other person as he shall have designated at the time of his retirement.

Option 3. A reduced retirement allowance payable during the beneficiary's lifetime with the provision that, after his death, one-half the reduced retirement allowance is to be continued throughout the life of such other person as he shall have designated at the time of his retirement.

CONTRIBUTIONS

By Members

Members contribute, by deduction from each payroll, at the rate of 4% of their earnable compensation.

By Employers

Employers make annual contributions consisting of a "normal contribution" and an "accrued liability contribution". The "normal contribution" rate is determined by the actuary after each valuation. The "accrued liability contribution" rate is determined by the first actuarial valuation of the system, provided, however, that each year's accrued liability payment is to be at least 3% greater than the preceding annual accrued liability payment. On and after July 1, 1946, all employers' contributions for teachers are paid by the State.

Note 1 - See

MEMBERSHIP OF THE SYSTEM

ACTIVE MEMBERS

The following table shows the number and annual earnable compensation of active members, as of June 30, 1948, on the basis of which the valuation was prepared. The complete record for each of the 35,748 members reported to be active on June 30, 1948 was not available owing to the enormous amount of detailed work required in setting up the record system. Records were submitted for 29,935 members and the valuation results were adjusted to take account of the actual membership on June 30, 1948.

In the table, "Members with Prior Service Credit" are members who are entitled to credit for service rendered prior to July 1, 1945, while "New Entrants" are members not entitled to such credit.

VALUATION OF ASSETS AND LIABILITIES

The following valuation balance sheet shows the assets and liabilities of the system, as of June 30, 1948. The present assets shown on the balance sheet were taken from the Audit Report prepared by the State Auditor's office.

C. A. St.

TABLE 3. *THE INFLUENCE OF THE VARIOUS FIBERS ON THE STRENGTH OF THE CLOTHES*

VALUATION BALANCE SHEET SHOWING THE ASSETS AND LIABILITIES OF THE
SOUTH CAROLINA RETIREMENT SYSTEM
AS OF JUNE 30, 1948

professions of the law, medicine, dentistry, engineering, architecture, accounting, accounting, etc., may be easily learned. The student will be exposed to every type of office work, and will be given the opportunity to practice his trade. After graduation, he will be well prepared for any kind of office work.

TABLE 3

VALUATION BALANCE SHEET SHOWING THE ASSETS AND LIABILITIES OF THE
SOUTH CAROLINA RETIREMENT SYSTEM

AS OF JUNE 30, 1948 IN THOUSANDS OF DOLLARS

APRIL 1, 1948 TO JUNE 30, 1948
ASSETS

Present Assets.....	\$ 10,450,251
Present value of prospective contributions to be made by employers in the future:	
Normal Contributions.....	\$ 12,361,744
Accrued Liability Contributions.....	<u>42,174,580</u>
Total prospective contributions by employers.....	<u>54,536,324</u>
Total Assets.....	\$ 64,986,575

This valuation is intended to show what would happen if all contributions were invested at 4% interest and no benefits were paid until June 30, 1948. It is based upon the assumption that the system will have no expenses other than interest and administrative costs.

The present value of members' contributions accumulated to date is \$4,639,116. The present value of prospective benefits to be provided by employers to active members is \$56,294,543. The total liabilities of the system as of June 30, 1948, are \$64,986,575.

TABLE 3

**VALUATION BALANCE SHEET SHOWING THE ASSETS AND LIABILITIES OF THE
SOUTH CAROLINA RETIREMENT SYSTEM**

AS OF JUNE 30, 1948

LIABILITIES OR REQUIREMENTS FOR PAYMENT

Present value of members' contributions accumulated to date.....	\$ 4,639,116
Present value of benefits payable on account of beneficiaries and dependents.....	4,052,916
Present value of prospective benefits on account of active members to be pro- vided by contributions of employers.....	56,294,543
Total Liabilities.....	\$ 64,986,575

COMMENTS ON VALUATION

The valuation balance sheet shows that the total liabilities of the system amounted to \$64,986,575, as of June 30, 1948. Of this amount, \$4,639,116 is the present value of members' contributions accumulated to date in the system. The liability for retirement allowances payable on account of beneficiaries and dependents on the roll is \$4,052,916. The balance, or \$56,294,543, represents the present value of prospective benefits to present active members to be provided from the contributions of employers.

Against the total liabilities of \$64,986,575, the balance sheet shows that the system has present assets of \$10,450,251. The difference between these amounts is \$54,536,324, which represents the present value of prospective contributions to be made by the employers. Of this amount, \$12,361,744 is the present value of future normal contributions and the balance, or \$42,174,580, is the value of the employers' future accrued liability contributions.

The retirement act provides that the contributions of employers shall consist of a normal contribution to cover the liability on account of service currently rendered and an accrued liability contribution on account of liabilities assumed, due to service rendered prior to the establishment of the system.

The valuation indicates that employer contributions based on a normal rate of 3.39 per cent of compensation for teachers, and 1.96 per cent of compensation for employees, based on the prevailing rates of compensation for employees will be sufficient to meet the currently accruing liabilities of the system.

The valuation indicates that an accrued liability contribution equal to 5.33 per cent of the compensation for teachers, and 3.05 per cent of the compensation for employees should be made towards liquidating the outstanding accrued liability.

The total of the contributions required of employers is therefore equal to 3.39 per cent plus 5.33 per cent, or 8.72 per cent of the compensation of teachers; and 1.96 per cent plus 3.05 per cent, or 5.01 per cent of the compensation of employees.

The following table gives the rates of contribution payable by employers, which are recommended for payment on the basis of the present valuation.

TABLE 4

ON THE BASIS OF THE VALUATION AS OF JUNE 30, 1948

<u>RATE OF CONTRIBUTION:</u>	<u>TEACHERS</u>	<u>EMPLOYEES</u>
Normal.....	3.39%	1.96%
Accrued Liability....	5.33	3.05
Total.....	8.72%	5.01%

SERVICE AND MORTALITY EXPERIENCE

Section 6, Subsection (12), of the act provides in part that, in the year 1947 and at least once in each five-year period thereafter, the actuary is to make an actuarial investigation into the mortality, service and compensation experience of the members and beneficiaries of the system. Although the amount of experience accumulated to date is insufficient to give a definite indication of the long term trend, such tests as could be made on the basis of the available data show that the tables adopted are proving satisfactory for use under the Plan.

BASIS FOR THE VALUATION

The valuation of the retirement system was made on the basis of the mortality and service tables adopted by the Board under date of February 18, 1946. An interest rate of 4 per cent per annum was used.

A detailed record of each member of the system on the valuation date was required as a basis for determining the assets and liabilities of the system. The data provided by these records, which were submitted by the Retirement Board, were transferred to tabulating machine cards for use in making the necessary tabulations. Summaries of the tabulations of the data submitted are given in the following tables. As previously indicated, the complete data for only 29,935 active members were available, as of the valuation date. The tabulations were based on this number and consequently the following tables show this number. The valuation results, however, were adjusted to allow for the full membership of 35,748.
